SITOP PSU400M/DC/DC/600V/24V/20A

SITOP PSU400M 20 A DC/DC converter input: 600 V DC output: 24 V DC/20 A

Input	
type of the power supply network	DC voltage
supply voltage at AC	
initial value	startup from 340 V DC; derating necessary at 300 400 V DC and 824 900 V DC
supply voltage	
• at DC	600 600 V
input voltage	
• at DC	300 900 V
overvoltage overload capability	Shutdown at Vin > 900 V DC
input current	
at DC at rated input voltage 600 V	0.85 A
current limitation of inrush current at 25 °C maximum	8 A
I2t value maximum	0.02 A ² ·s
fuse protection type	yes, cut-off capacity 20 kA; L/R < 2 ms ("+" and "-" input)
Output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	24 V
output voltage	
at output 1 at DC rated value	24 V
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
 on slow fluctuation of input voltage 	0.3 %
on slow fluctuation of ohm loading	0.3 %
residual ripple	
• maximum	150 mV
• typical	30 mV
voltage peak	
• maximum	200 mV
• typical	100 mV
adjustable output voltage	24 28.8 V
product function output voltage adjustable	Yes
type of output voltage setting	via potentiometer; max. 480 W
display version for normal operation	Green LED for 24 V OK, green flashing LED for start delay
type of signal at output	Relay contact (NO contact, rating 60 V DC/ 0.3 A; 30 V DC/1 A) for 24 V OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	0.1 s; 10 s adjustable using switch
voltage increase time of the output voltage	
• maximum	150 ms

output current	
• rated value	20 A
• rated range	0 20 A; +60 +70 °C: Derating 5.5%/K
supplied active power typical	480 W
short-term overload current	40.4
on short-circuiting during the start-up typical	40 A
at short-circuit during operation typical duration of overloading capability for excess current	60 A
on short-circuiting during the start-up	150 ms
at short-circuit during operation	25 ms
constant overload current	20 1113
on short-circuiting during the start-up typical	23 A
product feature	2071
bridging of equipment	Yes; switchable characteristic
number of parallel-switched equipment resources for	2
increasing the power	
Efficiency	
efficiency in percent	95 %
power loss [W]	
• at rated output voltage for rated value of the output	25 W
current typical	
Closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	1.5 %
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	1.5 %
setting time	
load step 50 to 100% typical	1 ms
● load step 100 to 50% typical	1 ms
setting time	
• maximum	5 ms
Protection and monitoring	
Protection and monitoring design of the overvoltage protection	< 33 V
	< 33 V 22 A
design of the overvoltage protection	
design of the overvoltage protection response value current limitation typical	22 A
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature"
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output	22 A Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic resource protection class	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic resource protection class protection class IP	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I IP20
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability • CE marking • UL approval • CSA approval	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I IP20 Yes
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability • CE marking • UL approval • CSA approval • CCSAus, Class 1, Division 2	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 No
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability • CE marking • UL approval • CSA approval • CSA approval • CCSAus, Class 1, Division 2 • ATEX	Yes Alternatively, constant current characteristic approx. 22 A or latching shutdown 22 A overload capability 150 % lout rated up to 5 s/min LED yellow for "overload", LED red for "latching shutdown", red LED flashing for "Overtemperature" Yes Protective extra low output voltage Vout according to EN 60950-1 and EN 50178 Class I IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259 Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259
