

## General Description

The 8343-01 is a low skew, 1-to-16 LVCMOS/LVTTTL Fanout Buffer. The 8343-01 single ended clock input accepts LVCMOS or LVTTTL input levels. The ICS8343-01 operates at 3.3V, 2.5V and mixed 3.3V input and 2.5V supply modes over the commercial temperature range. Guaranteed output and part-to-part skew characteristics make the 8343-01 ideal for those clock distribution applications demanding well defined performance and repeatability.

## Features
