## Effective October 2016 Supersedes December 2011

# M Supercapacitors Cylindrical cells

## Features

- 2.5 Volts
- Low ESR
- · High capacitance long cycle life
- · Low ESR with high energy density
- · Low leakage current
- UL recognized

## Applications

- Pulse Power
- Bridge or hold-up power

# Description

Eaton supercapacitors are unique, ultra-high capacitance devices utilizing electrochemical double layer capacitor (EDLC) construction combined with new, high performance materials. This combination of advanced technologies allows Eaton to offer a wide variety of capacitor solutions tailored to specific applications that range from a few micro-amps for several days to several amps for milliseconds.

# Technical Data 4080 Effective October 2016

# Ratings

| Capacitance                 | 1.0 F to 9.0 F                                   |
|-----------------------------|--|
| Maximum working voltage     | 2.5 V  |
| Surge voltage               | 3.0 V  |
| Capacitance tolerance       | -20% to +80% (+20 °C)                            |
| Operating temperature range | -40 °C to +60 °C                                 |
| Extended temperature range  | -40 °C to +85 °C (Maximum working voltage 2.0 V) |

# Manual solder

+350 °C, 4-5 seconds. (by soldering iron), generally manual, hand soldering is not recommended.

## **Reflow soldering**

Do not use reflow soldering using infrared or convection oven heating methods.

# **Cleaning/Washing**

Avoid cleaning of circuit boards, however if the circuit board must be cleaned use static or ultrasonic immersion in a standard circuit board cleaning fluid for no more than 5 minutes and a maximum temperature of +60 °C. Afterwards thoroughly rinse and dry the circuit boards. In general, treat supercapacitors in the same manner you would an aluminum electrolytic capacitor.

Life Support Policy: Eaton does not authorize the use of any of its products for use in life support devices or systems without the express written approval of an officer of the Company. Life support systems are devices which support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.

Eaton reserves the right, without notice, to change design or construction of any products and to discontinue or limit distribution of any products. Eaton also reserves the right to change or update, without notice, any technical information contained in this bulletin.
