**Inputs**

|                |   |
|----------------|---|
| NPN/PNP        | One jumper configures all inputs with either pull-up for NPN (contact closes to 0V) type sensors, or pull-down for PNP (close to V+) type sensors   |
| Logic Level 0: | 0V to +1V   |
| Logic Level 1: | +2.0V to +30V   |
| Input counting | User programmable - counts positive or negative transitions<br>Up to 250Hz count rate<br>16-bit (65335 count) or 32-bit (4.2 billion count) counters<br>Counter values persist over power-off periods |
| Input latching | Triggered by user programmable positive or negative edges, stays true until acknowledged  |
| Debouncing     | User programmable debouncing for noisy contact inputs   |

**Outputs**

|                             |  |
|-----------------------------|--|
| Maximum output current      | 0.85A on all outputs simultaneously<br>(ambient temperature $\leq 70^{\circ}\text{C}$ , 1 m/s airflow)<br>0.5A on all outputs simultaneously<br>ambient temperature $70\text{-}80^{\circ}\text{C}$ , 1 m/s airflow<br>Outputs can be paralleled for higher current loads |
| Output Type                 | Current sink to 0V (low-side switch, open-drain MOSFET output), allowing loads at multiple voltages  |
| Maximum output load Voltage | 36V  |
| Production                  | Intelligent short circuit protection up to 36V<br>Over-temperature shutdown<br>ESD Protection to 16kV  |
| Quick-Stop function         | When a user programmable input transitions to a preconfigured high or low state then all outputs go to a user programmable known good state  |
