## ISL6740EVAL3Z

User Guide

The I SL6740EVAL3Z serves as a reference design for a 48V to  $\pm$ 12V, 3.3V and 1.5V isolated power supply. It utilizes an ISL6740 double-ended voltage mode controller in half bridge topology to provide an isolated 48V to  $\pm$ 12V conversion. An ISL6402 dual PWM controller in synchronous buck topology provides the 3.3V and 1.5V outputs from the +12V rail. The reference design also provides pads to implement an optional LDO using the ISL6402 as a controller.

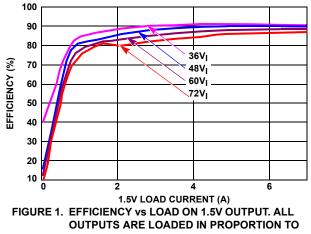

### Specifications

- Input Voltage: 36V to 72V
- Outputs:

3.3V ±1% @ 4A 1.5V ±1% @ 7A 12V +3.5%/-10% (typical) @ 1.5A -12V +3.5%/-10% (typical) @ 1.5A

• Efficiency at full load: 86.8% (72V input) to 90.3% (36V input)

Efficiency is plotted in Figure 1 overload, and for various input voltages V<sub>I</sub>. The current shown on the X axis represents load current on the 1.5V output. In this test, the loads on the 3.3V, +12V and -12V outputs were all varied proportionately to the 1.5V load. At 7A (maximum 1.5A load), for example, the 3.3V output load is 4A and the +12V and -12V outputs are loaded at 1.5A each.

THE 1.5V OUTPUTS' FULL LOAD.

Regulation on the 1.5V and 3.3V outputs is very good over line and load due to individual control loops. The  $\pm$ 12V outputs, however, are regulated together. While this saves cost and board space by eliminating additional feedback circuitry, there is a penalty in terms of regulation performance. Figure 2 shows the worst case scenario of an unloaded -12V output with the remaining outputs being stepped from no load to fully loaded. When full load on the +12V, +3.3V and +1.5V outputs is reached, a worst case error of about -10% is seen. Figures 3 and 4 show typical 3.3V and 1.5V output regulation over load. **USER'S MANUAL** 

AN1127 Rev 2.00 Aug 1, 2007

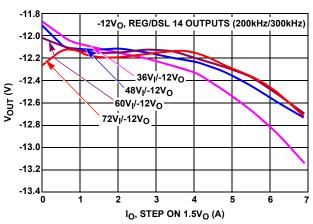

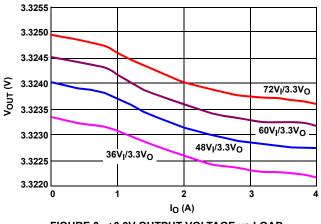

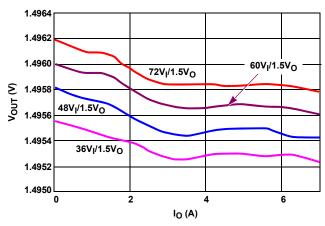

FIGURE 2. -12V OUTPUT VOLTAGE AS ALL OTHER OUTPUT ARE STEPPED FROM UNLOADED TO FULLY LOADED

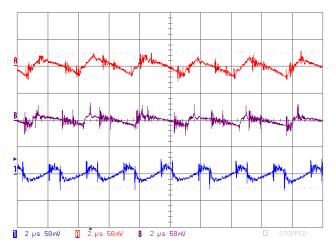

AN1127 Rev 2.00 Aug 1, 2007

Ripple and noise measurements are illustrated in Figure 5 for an input of 48V, with all outputs fully loaded. In general peak noise + ripple on the test board is  $80mV_{P-P}$ .

Start-up response is shown in Figure 6 for  $48V_{IN}$ , with all outputs fully loaded except for -12V, which is unloaded. The 3.3V and 1.5V start-up responses are independent of input voltage. The 12V output exhibits from 0V to 1V of overshoot as input voltage varies from 36V to 72V.

Figures 7 and 8 show transient responses on the 3.3V line as its load is stepped from 0% to 50% (2A), and from 50% to 0%. Likewise, the transient responses of the 1.5V line are shown in Figures 9 and 10. Figures 11 and 12 show the 24V (+12V to -12V) responses to 25% to 75% and 75% to 25% load steps.

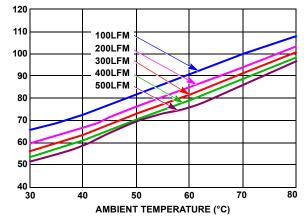

FIGURE 13. HOTTEST PART TEMPERATURE (°C) vs AMBIENT TEMPERATURE (°C) AND AIR FLOW AT 36V INPUT

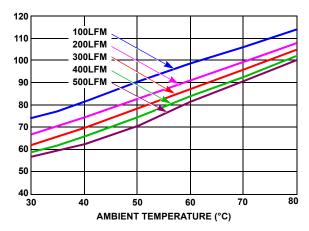

FIGURE 14. HOTTEST PART TEMPERATURE (°C) vs AMBIENT TEMPERATURE (°C) AND AIR FLOW AT 72V INPUT

Thermal data is provided in Figures 13 and 14 for input voltages of 36V and 72V, respectively. These plots show the temperature of the hottest component vs ambient temperature for air flow rates of 100LFM to 500LFM.

Figure 15 shows a thermal image of the board running at an input voltage of 48V. This image was taken with the board running at full power with a 300LFM air flow rate.

Figures 16 through 21 show the layout of the evaluation board. The bill of materials (BOM) and the schematics are shown in the following. This evaluation board has been designed to meet ROHS compliance.

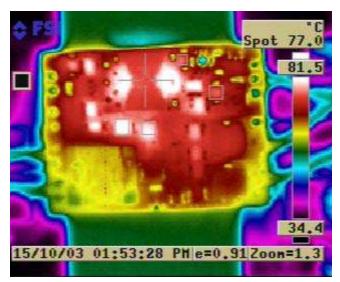

FIGURE 15. THERMAL IMAGE: 48V INPUT, 300LFM AIR FLOW

#### Notice

- 1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information
- 2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples
- 3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
- 4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
- Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
  - "Standard" Computers: office equipment: communications equipment: test and measurement equipment: audio and visual equipment: home electronic appliances; machine tools; personal electronic equipment: industrial robots: etc.

"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc. Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.

- 6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics oroducts outside of such specified ranges
- 7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
- 8. Plea e contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
- 9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions
- 10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
- 11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics
- 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products
- (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries
- (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
