

DECALPRO (GRAPHICS)

Make REAL Dry Transfer Graphics

... in less than 10 minutes!

Create your own custom, pressure sensitive, dry-transfer graphics & text (nomenclature) in WHITE, GREY, BLACK, METALLICS and FULL COLOR in 10 minutes using any conventional laser printer or photo-static copier.

Now that you have your circuit board finished with our [PCB Fab-In-A-Box](#), time to make your enclosure look even more impressive! The only other item you need beside this kit is the laminator (see right >) to create the images, ready for transfer. For more info on the process visit our website at [DecalProFX.com](#).

KIT CONTENTS:

- Toner Transfer Paper 20x 8-1/2" x 11" Sheets
