

Adjustable Parts Box

PRT-13867

Description: This is a small, adjustable part box for components, breakouts and development boards. Made from a clear polypropylene with reliable locking tabs, this box is incredibly durable and water-resistant. The best part about this little box is the six included dividers that can modify the inside of the container, providing you with compartments as small as 10mm x 40mm.

Internally, the Adjustable Parts Box features a 145mm x 80mm area with a fixed divider encroaching halfway inside on both axes located on the right side. Simply put, this parts box is a great economical option that can easily be modified to fit the needs of anyone looking to store the bits and bobs cluttering their work area.

Dimensions:

- Internal: 145mm x 80mm (not accounting fixed divider)
- External: 155mm x 90mm
- Optional Compartment Widths: 10mm–65mm
