Part No:
TG.30.8111W

Features:

600-6000MHz Operational

Wideband Cellular 5G/4G

Typical 70%+ Efficiency and 3dBi+ Peak Gain

Dipole Straight Terminal Antenna

Straight SMA(M) Connector

RoHS and REACH Compliant

1. Introduction

The Apex White Straight TG.30 Dipole LTE Antenna - is primarily designed for use with 5G/4G modules and devices that require the highest possible efficiency and peak gain to deliver best in class throughput on all major cellular (5G/4G/3G/2G) bands worldwide for access points, terminals and routers. The antenna is a ground plane independent antenna with a SMA (M) connector.

The Apex exhibits high efficiency across the wide band and is backward compatible with 2G and 3G cellular applications such as GSM, LTE, UMTS, WI-FI and even has GPS included for Assisted GPS and/or E911 applications. With very high efficiency on every cellular band globally it is an ideal solution for any device requiring high, reliable performance. It is also guaranteed to meet any type approval or carrier certification requirements from a RF standpoint. It is an omni-directional antenna and the radiation patterns display this and are stable across all bands.

Typical Applications Include:
Gateways and Routers
Smart Metering
Payment Terminals

It has a quality robust UV resistant housing for use with wireless terminals. This patented antenna is also available in black; with swivel mechanism and right angled versions. It is also available with swivel mechanism, hinged and right angle connectors. The connector can be changed subject to NRE or MOQ. For further information please contact your regional Taoglas customer support team.
