

## Boron 2G/3G Kit

Note: Live in the United States? Check out the Boron LTE. See the cellular FAQ for 2G/3G country availability.

The Boron GSM is a powerful 2G/3G enabled development kit that can act as either a standalone cellular endpoint or 2G/3G enabled gateway for Particle Mesh networks. It is based on the Nordic nRF52840 and has built-in battery charging circuitry so it's easy to connect a Li-Po and deploy your local network in minutes.

The Boron is great for connecting existing projects to the Particle Device Cloud or as a gateway to connect an entire group of local endpoints where Wi-Fi is missing or unreliable.

All Particle hardware is designed from the ground up to work with the Device Cloud; a powerful set of tools and infrastructure to build, connect, and manage your IoT fleet. The Device Cloud for Particle Mesh will be priced by network. All Particle customers get 3 free months of Device Cloud access for micro networks using a cellular gateway. A micro network is defined as a network with 10 total devices and a single gateway. More pricing details to be released soon. In the meantime, check out our documentation.

## Contents:

- o Boron 2G/3G dev board
- o Mini breadboard
- Cellular flex antenna
- o 1800mAh Li-Po battery
- USB cable
- o Starter project includes two resistors (220 ohm), one red LED, and one photodiode

## Specs:

- o u-blox SARA U201 2G/3G modem
  - HSPA/GSMqq with global hardware and SIM support
  - 3GPP Release 7
  - Bands 800/850/900/1900/2100 MHz
- o Nordic Semiconductor nRF52840 SoC
  - ARM Cortex-M4F 32-bit processor @ 64MHz
  - 1MB flash, 256KB RAM
  - IEEE 802.15.4-2006: 250 Kbps
  - Bluetooth 5: 2 Mbps, 1 Mbps, 500 Kbps, 125 Kbps
  - Supports DSP instructions, HW accelerated Floating Point Unit (FPU) calculations

- ARM TrustZone CryptoCell-310 Cryptographic and security module
- Up to +8 dBm TX power (down to -20 dBm in 4 dB steps)
- NFC-A tag
- o On-board additional 2MB SPI flash
- o 20 mixed signal GPIO (6 x Analog, 8 x PWM), UART, I2C, SPI
- o Micro USB 2.0 full speed (12 Mbps)
- o Integrated Li-Po charging and battery connector
- o JTAG (SWD) Connector
- o RGB status LED
- o Reset and Mode buttons
- o Dual SIM support: Nano 4FF and MFF2
- o U.FL connector for external antenna
- o Meets the Feather specification in dimensions and pinout
- FCC and PTCRB certified
- o RoHS compliant (lead-free)
