Package Marking and Ordering Information

Device Marking	Device	Package	Reel Size	Tape Width	Quantity
FDD4685	FDD4685-F085	D-PAK(TO-252)	13”	12mm	2500units

Notes:
1. Current is limited by bondwire configuration.
2. Starting T_J = 25°C, L = 3mH, I_{AS} = 9A, V_{DD} = 40V during inductor charging and V_{DD} = 0V during time in avalanche.
3. $R_{\theta JA}$ is the sum of the junction-to-case and case-to-ambient thermal resistance, where the case thermal reference is defined as the solder mounting surface of the drain pins. $R_{\theta JC}$ is guaranteed by design, while $R_{\theta JA}$ is determined by the board design. The maximum rating presented here is based on mounting on a 1 in^2 pad of 2oz copper.
4. A suffix as “…F085P” has been temporarily introduced in order to manage a double source strategy as ON Semiconductor has officially announced in Aug 2014.
