

# 9313

## 8-INPUT MULTIPLEXER

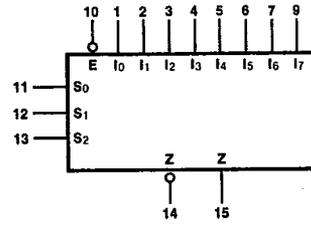

(With Open-Collector Output)

**CONNECTION DIAGRAM**  
PINOUT A

**DESCRIPTION** — The '13 is an 8-input multiplexer with open-collector output. It has the same pinning and logic configuration as the '12, but with an open-collector  $\bar{Z}$  output which allows for easy expansion of input terms. The device can select one bit of data from up to eight sources. The '13 has an active LOW enable and internal select decoding.

**LOGIC SYMBOL**

Vcc = Pin 16  
GND = Pin 8

- PIN FOR PIN REPLACEMENT FOR THE SIGNETICS 8231
- SAME PINNING AND LOGIC CONFIGURATION AS THE 9312 BUT WITH OPEN-COLLECTOR OUTPUT
- OPEN-COLLECTOR OUTPUT  $\bar{Z}$  FOR EASY EXPANSION OF INPUT TERMS (WIRED-OR APPLICATIONS)
- MULTIFUNCTION CAPABILITY
- ON-CHIP SELECT LOGIC DECODING
- FULLY BUFFERED Z OUTPUT

**ORDERING CODE:** See Section 9

| $\bar{Z}$ *                     | Complementary Multiplexer Output | OC**/10              |

\*An external pull-up resistor is needed to provide HIGH level drive capability. This output will sink a maximum of 16 mA at V<sub>out</sub> = 0.4 V.  
\*\*OC — Open Collector

**FUNCTIONAL DESCRIPTION** — The '13 is a logical implementation of a single pole, eight-position switch with the switch position controlled by the state of three Select inputs, S<sub>0</sub>, S<sub>1</sub>, S<sub>2</sub>. An open-collector output  $\bar{Z}$  is provided for easy expansion of input terms. Also a fully buffered Z output is available. The Enable Input ( $\bar{E}$ ) is active LOW. When it is not activated the negation output is HIGH and the assertion output is LOW regardless of all other inputs. The logic function provided at the output is:

$$Z = \bar{E} \cdot (I_0 \cdot \bar{S}_0 \cdot \bar{S}_1 \cdot \bar{S}_2 + I_1 \cdot S_0 \cdot \bar{S}_1 \cdot \bar{S}_2 + I_2 \cdot \bar{S}_0 \cdot S_1 \cdot \bar{S}_2 + I_3 \cdot S_0 \cdot S_1 \cdot \bar{S}_2 + I_4 \cdot \bar{S}_0 \cdot \bar{S}_1 \cdot S_2 + I_5 \cdot S_0 \cdot \bar{S}_1 \cdot S_2 + I_6 \cdot \bar{S}_0 \cdot S_1 \cdot S_2 + I_7 \cdot S_0 \cdot S_1 \cdot S_2)$$

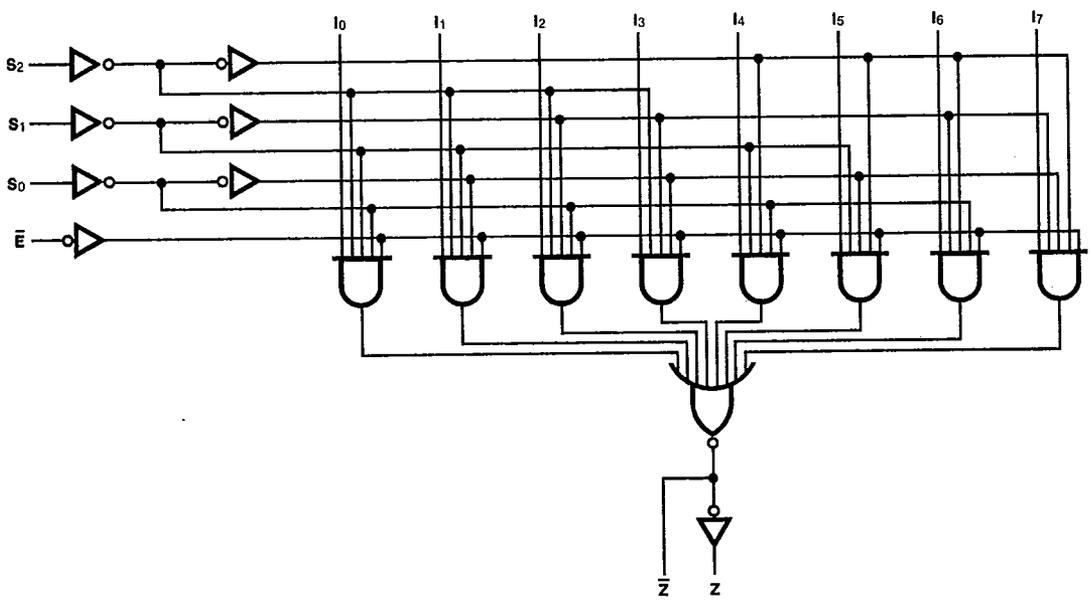

The '13 provides the ability, in one package, to select from eight sources of data or control information. By proper manipulation of the inputs, the '13 can provide any logic functions of four variables and its negation.

**TRUTH TABLE**

| INPUTS    |                |                |                | OUTPUTS     |                |
