# **MECHANICAL and PACKAGING**

- CASE: Hermetically sealed glass package.
- TERMINALS: Tin/Lead or RoHS compliant matte/tin (commercial grade only) plated copper clad steel.
- MARKING: Blue body coat with black digits.
- POLARITY: Cathode end is banded.
- TAPE & REEL option: Standard per EIA-296. Consult factory for quantities.
- WEIGHT: 0.2 grams.
- See <u>Package Dimensions</u> on last page.

## PART NOMENCLATURE

| SYMBOLS & DEFINITIONS |  |  |  |  |  |  |  |
|-----------------------|--|--|--|--|--|--|--|
| Symbol                | Definition   |  |  |  |  |  |  |
| lF                    | Forward Current.   |  |  |  |  |  |  |
| Ι <sub>Ο</sub>        | Average Rectified Output Current: The Output Current averaged over a full cycle with a 50 Hz or 60 Hz sine-wave input and a 180 degree conduction angle.                                       |  |  |  |  |  |  |
| I <sub>R</sub>        | Reverse Current: The maximum reverse (leakage) current that will flow at the specified voltage and temperature.  |  |  |  |  |  |  |
| VF                    | Maximum Forward Voltage: The maximum forward voltage the device will exhibit at a specified current.   |  |  |  |  |  |  |
| V <sub>RWM</sub>      | Working Peak Reverse Voltage: The maximum peak voltage that can be applied over the operating temperature range excluding all transient voltages (ref JESD282-B). Also sometimes known as PIV. |  |  |  |  |  |  |
| V <sub>WM</sub>       | Working Peak Voltage: The maximum peak voltage that can be applied over the operating temperature range. This is also referred to as Standoff Voltage.   |  |  |  |  |  |  |

PACKAGE DIMENSIONS

### NOTES:

- 1. Dimensions are in inches.
- 2. Millimeters are given for general information only.
- 3. In accordance with ASME Y14.5M, diameters are equivalent to  $\Phi x$  symbology.

|     | Dimensions |       |             |       |  |  |  |
