

500 Feet 9-Conductor (24AWG) Stranded-Shielded Bulk Cable M110-9C24G-500

These 24AWG (American Wire Gauge) 9 bare copper conductor RS-232 multiconductor cables are used to create serial patch cables for a wide variety of applications, usually for computer peripherals.

RS-232 is a precursor to USB and is used for many of the same devices, such as printers, as well as modems.

RS-232 is also commonly used for sophisticated machinery in laboratories, automated manufacturing plants, and other hi-tech environments.

100% Overall Foil Shield.

Specifications/Contents:

Model: M110-9C24G-500

Length: 500 ft

Weight: 20 lbs

Outer Diameter: 5.9 mm
