

FEATURES

- LOW COST
- INTERNAL FILTERING
- SURFACE MOUNT CONSTRUCTION
- TEMPERATURE RANGE: -25°C TO +70°C
- INDUSTRY STANDARD PINOUT
- ROHS COMPLIANT

DESCRIPTION

The HL02RYC Series offers an extensive selection of input and output voltage combinations to choose from. These miniature, regulated DC/DC converters come in 24 pin DIP and SMD packages. This small size is possible through the use of surface mount manufacturing technologies.

OBSOLETE PRODUCT

Contact Factory for Replacement Model

The HL02RYC Series utilizes a 110 KHz push-pull oscillator in the input stage with low-drop regulators on the outputs, reducing the output noise and maintaining good efficiency.

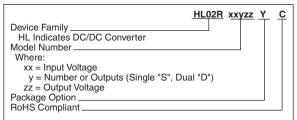

The use of surface mount construction and automated manufacturing processes increase consistency and reliability while reducing overall cost.

ABSOLUTE MAXIMUM RATINGS

Internal Power Dissipation	1.5W
Short Circuit Duration	30 Sec
Lead Temperature (soldering, 10 seconds max)	+300°C*

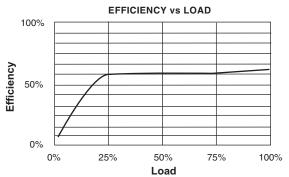

^{*}Note: Refer to Reflow Profile for SMD Models.

ORDERING INFORMATION

TYPICAL PERFORMANCE CURVES

Specifications typical at $T_{\rm A}$ = +25°C, nominal input voltage, rated output current unless otherwise specified.

2 WATT REGULATED DC/DC CONVERTER

ELECTRICAL SPECIFICATIONS

Specifications typical at $T_A = +25$ °C, nominal input voltage, rated output current unless otherwise specified.

2 WATT REGULATED DC/DC CONVERTER

MECHANICAL Package/Pinout "Y"

DIP PACKAGE

NU = Do Not Use.

NC = No Internal Connection.

Duplicate pin functions are internally connected.

All dimensions are in inches (millimeters).

GRID: 0.100 inches (2.54 millimeters)

Typically Marked with: specific model ordered, date code, job code and Logo.

Pin base metal is phosphor bronze. Pin finish is matte tin (100-300 microinches) over a nickel barrier layer (5-40 microinches).

PIN	PIN CONNECTIONS

THROUGH-HOLE SOLDERING INFORMATION

These devices are intended for wave soldering or manual soldering.

They are not intended to be subject to surface mount processes under any circumstances.

The normal wave soldering process can be used with these devices where the device is subjected to a maximum wave temperature of 260°C for a period of no more than 10 seconds. Within this time and temperature range, the integrity of the device's plastic body will not be compromised and internal temperatures within the converter will not exceed 175°C. Care should be taken to control manual soldering limits identical to that of wave soldering.
