Private information can easily fall into the wrong hands.
Why risk it?

3M™ Privacy Filters.

Data Protection for virtually any CRT or LCD monitor.

The misuse of confidential information has become so widespread that new laws were enacted to ensure privacy. That's why it's important not to leave the security of sensitive information on your computer screen to chance. 3M Privacy Filters help keep your confidential documents safe.
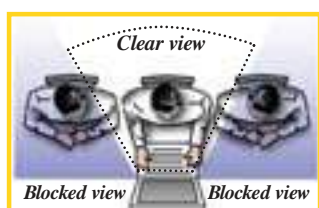

Using a unique technology, 3M Privacy Filters help prevent casual observers from viewing confidential on-screen information. The filters black out the view on either side of the monitor without blurring or distortion.

3M offers a wide variety of filters for virtually any type of computer screen. Many filters even include an extra set of hanger arms that allow you to use the filter on both CRT *and* LCD monitors. They are a simple and cost effective way of helping achieve compliance to the Data Protection Act (1998).

3M *Innovation*

3M Privacy Filters can help you comply with the new laws protecting privacy.

The Data Protection Act (1998) confirms that appropriate safeguards should be put into place to ensure there is no disclosure of personal data to unauthorised third parties, without the consent of the individual concerned. 3M Privacy Filters are helping companies comply with the new legislation by keeping the confidential data out of sight.

Extra hanger arms provide greater flexibility

All glass 3M Privacy filters now come with an extra set of hanger arms, allowing the filters to be used on either CRT or LCD monitors. LCD monitor users can simply remove the attached CRT hanger arms and snap the LCD arms in place for a perfect fit. Available in black or beige.

Laptop Privacy

Models PF13.3, PF14.1 & PF15.0 (Frameless)

- Protect privacy – 3M's privacy technology blacks out screen images so that only persons directly in front of the laptop can see on-screen data.
- Protect delicate LCD screens from scratches, fingerprints or damage.
- Filters attach and detach easily – can remain in place even when the laptop is closed.
- Available with two different attachment methods: tabs or double-sided adhesive stickers. Adhesive does not leave a sticky residue, and filter can be easily removed and reapplied.

Desktop Privacy

Models PF400L, XL, XXL (Flat Frame)
Models PF400LB, XLB (Black Flat Frame)

- Extra hanger arms allow filters to be used on both CRT *and* LCD monitors.
- Protect information with 3M's blackout privacy technology.
- Reduce glare by up to 95%.
- Eliminate ELF/VLF E-field radiation by up to 99.9%, and reduce static charge and dust buildup when properly grounded.

Models PF450, XL (Contour Frame)

- Wraparound frame for a seamless look on CRT and LCD monitors.
- Protect information with 3M's blackout privacy technology.
- Reduce glare by up to 95%.
- Eliminate ELF/VLF E-field radiation by up to 99.9%, and reduce static charge and dust buildup when properly grounded.

Models PF15.0, PF17.0 & PF18.1 (Frameless)

- Unobtrusive design works with LCD monitors.
- Protect information with 3M's blackout privacy technology.
- Protect delicate LCD screens from scratches, fingerprints or damage.
- Available with two different attachment methods: tabs or double-sided adhesive stickers. Adhesive does not leave a sticky residue, and filter can be easily removed and reapplied as necessary.
- Unique design will not cover speakers or buttons.

All 3M Privacy Filters come with a lifetime warranty.
