

Capacitor Care Package Product ID: 751-00012

Overview

Circuit not working? Put a capacitor on it!

Capacitors are used almost everywhere in electronics: from energy storage to signal coupling. (Signal coupling allows AC signals to pass while blocking DC signals. Like when Gandalf yells, "You. Shall. Not. Pass!" at Balrog in the mines of Moria. But you don't have to do that when you add one of these to your circuit. Bonus points if you do.)

Details

Kit Contents:

- (10) - 0.01 uF capacitor (#200-01031)
- (10) - 0.1 uF capacitor (#200-01040)
- (2) - 0.47 uF capacitor (#201-04740)
- (5) - 1 uF capacitor (#201-01050)
- (5) - 10 uF capacitor (#201-01062)
- (2) - 1000 uF capacitor (#201-01085)
- (1) - 3300 uF capacitor (#201-03080)
