

Switching Power Supply Type SPDM 75 DIN Rail Mounting

CARLO GAVAZZI

- Universal input 85~264Vac
- Short circuit protection
- Internal input filter
- High efficiency up to 89%
- High average efficiency meets ErP 2009/125/EC
- Low standby power consumption
- 3 years warranty

Product Description

The Switching power supplies SPDM Series are specially designed to be used in all automation application where the installation is on a DIN rail and compact dimensions and performance are a must. In particular the SPDM Series power supplies are significantly smaller than the standard power supplies of the same power. The greater compactness is achieved thanks to limited energy loss, that automatically generates greater effectiveness. This specific SPDM Series 75W Power supplies are available with 12VDC or 24VDC Output Voltage, with spring or screw terminals.
