

2U 2-PIECE TELCO RACK SHELF

The Kendall Howard 2-Piece Telco Rack Shelf is designed to complement any two-post rack. The unique design includes two separate 2U shelves that can be mounted on either side of a relay rack. Providing a 22" deep surface for supporting non rack mountable devices, the 2-Piece Telco Shelf is a spacious and sturdy shelving solution.

FEATURES

2-Piece Center Mount Design - Each 2U shelf can be mounted to either side of a two post rack. This 2-piece design provides a stronger more durable center mount solution.

Quality Manufacturing - Heavy-gauge steel and multiple strengthening flanges give this relay rack shelf a healthy 200 lb. weight capacity. The shelf is then finished with a textured powder coat to protect from scratches, abrasion, and more.

Rounded Corners - Rounded corners and edges prevent damage to installed components and/or injury to installers.

SPECIFICATIONS

Part Number	1906-3-300-02
Width	19"
Depth	9"
Height	3.47"
