onsemi

Dual Matched 40 V, 6.0 A, Low V_{CE(sat)} NPN Transistor NSS40301MDR2G

These transistors are part of the **onsemi** e²PowerEdge family of Low $V_{CE(sat)}$ transistors. They are assembled to create a pair of devices highly matched in all parameters, including ultra low saturation voltage $V_{CE(sat)}$, high current gain and Base/Emitter turn on voltage.

Typical applications are current mirrors, differential amplifiers, DC–DC converters and power management in portable and battery powered products such as cellular and cordless phones, PDAs, computers, printers, digital cameras and MP3 players. Other applications are low voltage motor controls in mass storage products such as disc drives and tape drives. In the automotive industry they can be used in air bag deployment and in the instrument cluster. The high current gain allows e²PowerEdge devices to be driven directly from PMU's control outputs, and the Linear Gain (Beta) makes them ideal components in analog amplifiers.

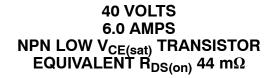

Features

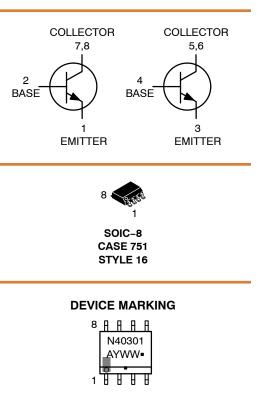

- Current Gain Matching to 10%
- Base Emitter Voltage Matched to 2 mV
- This is a Pb–Free Device

MAXIMUM RATINGS (T_A = 25°C)

| Rating | Symbol | Max | Unit |
|--------------------------------|------------------|----------------------------|------|
| Collector-Emitter Voltage | V _{CEO} | 40 | Vdc |
| Collector-Base Voltage | V _{CBO} | 40 | Vdc |
| Emitter-Base Voltage | V _{EBO} | 6.0 | Vdc |
| Collector Current – Continuous | ۱ _C | 3.0 | Α |
| Collector Current – Peak | I _{CM} | 6.0 | Α |
| Electrostatic Discharge | ESD | HBM Class 3B MM Class C | |

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.
