

Tail Skid (LIMITED TIME)

SKU:
290-015

Provide your two-wheeled application with much needed stability and balance, without the need for additional coding. Two screw holes provide a secure way to mount the tail skid to a chassis. Now your robotic masterpiece can speed by without risk of dragging critical components or part of the chassis on the ground.

Features:

- Includes two screw holes to safely secure the tail skid
- Provides the same height as the Motor, Wheel Kit, and Double Motor Mount combination
- Smooth bottom for low friction movement
- Hollow design for minimum weight addition
