

## 100 V, 40 A field-effect rectifier diode

### Features

- ST patented rectifier process
- Stable leakage current over reverse voltage
- Low forward voltage drop
- High frequency operation
- ECOPACK<sup>®</sup>2 compliant

### Applications

- Adapter
- Gaming console power supply
- Battery charger
- DC / DC converter

### Description

This single rectifier is based on a proprietary technology, enabling to achieve the best in class  $V_F/I_R$  for a given silicon surface.

Packaged in TO-220AB, TO-220FPAB and D<sup>2</sup>PAK, the FERD40H100S is optimized for use in confined applications where both efficiency and thermal performance are key. With a lower dependency of leakage current ( $I_R$ ) and forward voltage ( $V_F$ ) in function of temperature, the thermal runaway risk is reduced. It is highly recommended to be used in adapters and chargers.

2. Pulse test:  $t_p = 380$   $\mu$ s,  $\delta < 2\%$

To evaluate the conduction losses, use the following equation:

$$P = 0.420 \times I_{F(AV)} + 0.009 \times I_{F(RMS)}^2$$
