for energy efficiency, mobility  
and security

**Antenna Tuning Solutions**  
for Smartphones & Tablets

# Key Assets of Antenna Tuning

- **Increased number of bands in Smartphones call for band specific optimized antenna matching**
  - **Improves TIS** (=Total Isotropic Sensitivity)
    - Rx insensitivity to VSWR
  - **Improves TRP** (=Total Radiated Power)
    - Tx insensitivity to VSWR
  - **Higher Flexibility in Antenna Form Factors**
  - **Less system current consumption (PA)** through optimized matching
