CXA Series CXA-K0505-VJL

DC to AC Inverters

Connector type, Dimming, 2W, For 1 Bulb

FEATURES

- The CXA-K0505-VJL is an inverter for cold cathode fluorescent lamps and features a built-in dimmer.
- Because they employ advanced output current control, fluctuations in input voltage, load, and distributed capacitance have virtually no effect on brightness.
- Output open and short circuit conditions result in no damage, heat generation, or other difficulties.
- The bottom of the board has a flat structure that facilitates insulation.
- These parts are ultra-thin with a maximum thickness of only 6.3mm.
- Safe design that includes a built-in overcurrent protection element.
