Effective December 2017 Supersedes October 2014

# XV Supercapacitor Cylindrical snap-in

## Features and benefits

- Over 10-year operating life at room temperature
- Ultra low ESR for high power density
- Large capacitance for high energy density
- · Long cycle life
- UL Recognized

#### Applications

- · Hybrid battery or fuel cell systems
- High pulse current applications
- UPS / hold up power

## Description

Eaton supercapacitors are unique, ultra-high capacitance devices utilizing electrochemical double layer capacitor (EDLC) construction combined with new, high performance materials. This combination of advanced technologies allows Eaton to offer a wide variety of capacitor solutions tailored to specific applications that range from a few microamps for several days to several amps for milliseconds.

## Specifications

| Capacitance                          | 300 F to 600 F   |
|--------------------------------------|--|
| Working voltage                      | 2.7 V  |
| Surge voltage                        | 2.85 V   |
| Capacitance tolerance                | -5% to +10%  |
| Operating temperature range          | -40 °C to +65 °C   |
| Extended operating temperature range | -40 °C to +85 °C (with voltage derating to 2.3 V @ +85 °C) |

## Standard Product<sup>1</sup>

| Capacitance (F) | Part Number     | Max. initial<br>DC ESR (mΩ)<br>(Equivalent Series<br>Resistance) | Max continuous<br>current <sup>2</sup> (A) | Peak<br>current³ (A) | Max leakage<br>current⁴ (mA) | Max<br>power⁵ (W) | Stored<br>energy <sup>6</sup><br>(Wh) | Typical<br>mass (g) |
|-----------------|-----------------|--|--|----------------------|------------------------------|-------------------|---------------------------------------|---------------------|
| 300             | XV3550-2R7307-R | 4.5  | 20   | 160                  | 0.60                         | 410               | 0.30                                  | 62                  |
| 400             | XV3560-2R7407-R | 3.2  | 26   | 220                  | 0.85                         | 570               | 0.41                                  | 72                  |
| 600             | XV3585-2R7607-R | 2.6  | 33   | 320                  | 1.30                         | 790               | 0.60                                  | 108                 |

Capacitance, ESR and Leakage current are all measured according to IEC 62391-1 at +20 °C
15 °C Temperature Rise
Peak Current is for 1 second = 1/2 Working Voltage x Capacitance / (1 + DC ESR x Capacitance)
Leakage current measured after 72 hours, +20 °C
Max. Power = Working Voltage<sup>2</sup> / 4 / DC ESR
Stored energy = 1/2 Capacitance x Working Voltage<sup>2</sup> / 3600

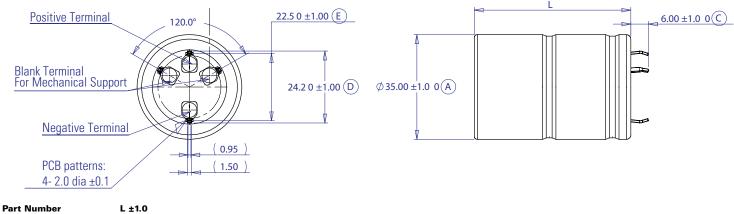

#### Performance

| Parameter                             |            | Capacitance Change<br>(% of initial value) | ESR<br>(% of max. initial value) |
|---------------------------------------|------------|--|----------------------------------|
| Life                                  |            |  |                                  |
| @ Max. operating voltage and temp)    | 1500 hours | ≤ 20%                                      | ≤ 200%                           |

|  |   |   |  |

## Manual solder

+350 °C, 4-5 seconds. (by soldering iron), generally manual, hand soldering is not recommended.

## **Cleaning/Washing**

Avoid cleaning of circuit boards, however if the circuit board must be cleaned use static or ultrasonic immersion in a standard circuit board cleaning fluid for no more than 5 minutes and a maximum temperature of +60 °C. Afterwards thoroughly rinse and dry the circuit boards. In general, treat supercapacitors in the same manner you would an aluminum electrolytic capacitor.

Life Support Policy: Eaton does not authorize the use of any of its products for use in life support devices or systems without the express written approval of an officer of the Company. Life support systems are devices which support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.
