* Insertion Loss performance quoted is measured on an open FR4 board mounted on a brass backplane in a 50Ω system. Performance curves can be supplied on request. Performance in circuit is liable to be different and is affected by board material, track layout, grounding efficiency and circuit impedances. Shielding can be used to improve high frequency performance.

Ordering Information - SBSGC range

| SB | S | G | C | 500 | 0473 | M | X | B |
|--------------------|---------------|-------------------------------------|--------------------------|---|--|-----------------|----------------|--|
| Type | Case style | Size | Electrical configuration | Voltage (dc) | Capacitance in picofarads (pF) | Tolerance | Dielectric | Packaging |
| Syfer Board Filter | Surface Mount | Size Code G (nominally 1812) | C = C Filter | 050 = 50V 100 = 100V 200 = 200V 500 = 500V | First digit is 0. Second and third digits are significant figures of capacitance code. The fourth digit is number of zeros following Example: 0472 = 4700pF 0683 = 68000pF | M = ±20% | X = X7R | T = 178mm (7") reel R = 330mm (13") reel B = Bulk |

Note: The addition of a 4-digit numerical suffix code can be used to denote changes to the standard part. Options include for example: change of finish / alternative voltage rating / non-standard intermediate capacitance values / test requirements. Please refer specific requests to the factory.
