## Why Buy A Maple HMI

In addition to our powerful and affordable hardware, we'll also continue to support your company long after a sale. Wide product selection, large in-stock inventory, outstanding product warranty, free technical support and software, and in-house repairs with quick turnaround times, Maple Systems has your business covered.

### Class I, Division 2 HMIs

We offer CID2 certified HMIs designed to keep operators and their environment safe. These HMIs are being used in a potentially dangerous environment or around flammable hazards every day, and are designed to prevent dangerous explosions and ensure worker safety.

Our CID2 HMIs (HMI5070L and HMI5070LB) are used in industries including oil and gas, mining, painting, chemical processing, pharmaceutical, food processing, and more.

We also have CID2/Atex certified [Industrial Panel PCs](#) and [Industrial Monitors](#). And for those looking for PLC functionality, we offer a Class I, Div 2 HMI+PLC combo series.

### Remote Access

Remote access is the ability to access a HMI or connected device, from another device, at any time, and from anywhere. With our free HMI configuration software and supported hardware solutions, you have the freedom to access the HMI, and all its data and applications, from another device (ex. tablet, smart phone, PC) and control it as if you were standing in front of it.

Need more? Access the [Industrial Internet of Things \(IIoT\)](#) with our Advanced HMIs. Take data from your factory floor and share it with a server (local or a cloud service), offering greater efficiency for network use and enabling better access to and better sharing data for your entire organization.

### Build your SCADA

We offer all the components you need to create your own unique level of supervisory data acquisition and control, from the simplest stand-alone machine to sophisticated multi-device networked production line(s), all the way to enterprise-level operations and IIoT functionalities leveraging cloud connectivity.

Our products can help you standardize communications between devices, gluing different systems together for one source to your SCADA. No need to redesign your entire application. Keep the components that are already working for you, just add Maple Systems components to grow your abilities to supervise, control, and acquire data.

## Power and Flexibility

## Incredible Functionality Out of the Box

- Easily and quickly create the project with functional objects including numeric object, lamp object, combo-button, alarms, and recipes
- Pick and place objects, pictures, and shapes
- Import/export recipes
- Create trend display, graphs, XY plots, and pie charts
- Add passwords and security levels
- Assign communication (PLC) drivers easily and more with our Free HMI software

Additionally our HMIs support remote access solutions with VNC, MQTT, and OPC UA. For additional features see our Advanced HMI series.

## User Friendly HMI Configuration Software

Because designing the layout of screens and user-interface (UI) of the HMI is typically where most of the development time is spent, we've made our Free HMI configuration software easy to use.

- Import tags feature
- Tools to diagnose and monitor PLC to HMI connection
- Debugging tools
- Pre-built libraries
- Off-line and on-line simulation

These are just a few of the ways our software makes creating your project easier. We also have controller information sheets, cable drawings, sample projects, Getting Started Guides, and videos/tutorials available in our [support center](#) 24/7.

## Programmable Logic Controller (PLC) Connectivity

With over 300 PLC & Controller communication protocols, these HMIs will easily integrate with your preferred PLC brands, including:

Allen-Bradley  
Siemens  
Omron  
Emerson  
GE  
Panasonic  
Mitsubishi  
[...and many more](#)

Allen-Bradley **ABB** babcock™

BALDOR *Danfoss* SIEMENS

MITSUBISHI **Parker**

TOSHIBA YASKAWA **Koyo**
