

SC SERIES BASIC EVALUATION / DEVELOPMENT SYSTEM

The EVAL-916-SC is a cost-effective way to evaluate the SC Series and begin integrating it into your own product. The kit features an on-board encoder / decoder with buzzer and relay outputs that allow range and interference testing in anticipated use environments. When you are ready to begin development, a convenient prototyping area with breakout headers and regulated power supply allows for rapid testing and interface.

Basic Kit Includes

- 2 Assembled Evaluation / Proto boards
- 2 SC Transceiver Modules*
- 2 CW (SC, SC-S) or RCS (SC-PA) Series Antennas
- 2 Extra RPSMA Antenna Connectors (SC, SC-S only)
- 2 9V Batteries
- Detailed Data Guides
- FCC Part 2 + Part 15 Guidelines

ORDERING INFORMATION

PART #	DESCRIPTION
EVAL-916-SC-P	SC Basic Evaluation System
EVAL-916-SC-PA	SC-PA Basic Evaluation System
EVAL-916-SC-S	SC-S Basic Evaluation System

SC SERIES MASTER EVALUATION / DEVELOPMENT SYSTEM

The most complete way to evaluate the SC Series and then begin the integration of it into your own design. The kit allows for full evaluation of the SC modules, and speeds the development of your own design via the included boardset which features an onboard prototyping area, RS-232 interface and breakout headers. Windows demonstration software is included.

SC Master Kit Includes

- 2 Assembled Development Boards w/Prototyping Area and RS-232
- 4 SC Transceiver Modules*
- 1 Software/Support CD
- 2 CW (SC, SC-S) or RCS (SC-PA) Series Antennas
- 2 Extra RPSMA Antenna Connectors (SC, SC-S only)
- 2 9V Batteries
- Detailed Manuals
- Part 2 & Part 15 Guidelines
- Free Technical Support

ORDERING INFORMATION

PART #	DESCRIPTION
MDEV-916-SC-P	SC Master Development System
MDEV-916-SC-PA	SC-PA Master Development System
MDEV-916-SC-S	SC-S Master Development System

QS SERIES MASTER EVALUATION / DEVELOPMENT SYSTEM

The most complete way to evaluate the QS Series and then begin the integration of it into your own design. The kit allows for full evaluation of the QS modules, and speeds the development of your own design via the included development board. The board demonstrates interfacing to RS232 devices and microcontrollers. A large prototyping area with a breakout header allows for quick and easy prototyping of your device on the development board itself. Drivers and software are included as well as source code and system examples to speed software development and system integration.

QS Master Kit Includes

- 1 Assembled Development Board
- 2 QS USB Modules*
- 1 Software/Support CD
- Detailed Manuals
- Free Technical Support

Features

- RS-232 <--> USB Interface
- Integrated RS-22 Level Converter
- On-Board Demo Microcontroller
- User Prototyping Area
- Pre-Assembled for Immediate Use
- Demonstration Software Included
- Sample Source Code Included
