Preliminary

Low-loss GPS RF SAW Filter

- No Matching Required for 50 Ω Source/Load Impedances
- Complies with Directive 2002/95/EC (RoHS)

Absolute Maximum Ratings

Rating	Value	Units
Input Power Level	+10	dBm
DC Voltage on any Non-grounded Terminal	3	V
Operating Temperature Range	-40 to +85	°C
Storage Temperature Range in Tape and Reel	-40 to +85	°C
Storage Temperture Range of Filter	-50 to +100	°C
Maximum Soldering Profile, 5 cycles/10 seconds maximum	265	°C

1575.42 MHz **SAW Filter**

SF1186E-1

SM3030-6

NOTES:

^{1.} Unless noted otherwise, all specifications apply over the operating temperature range with filter soldered to the specified demonstration board with impedance

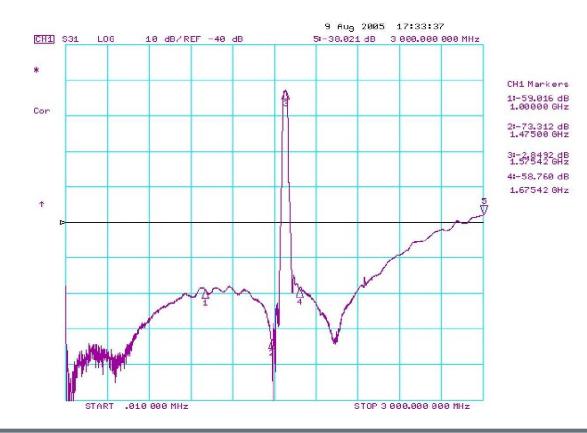

Unless noted otherwise, all specifications apply over the operating temperature range with intersoldered to the specified demonstration board with impedance matching to 50 Ω and measured with 50 Ω network analyzer. Unless noted otherwise, all frequency specifications are referenced to the nominal center frequency, fc. Rejection is measured as attenuation below the minimum IL point in the passband. Rejection in final user application is dependent on PCB layout and external impedance matching design. See Application Note No. 42 for details. 3.

Either Port 1 or Port 2 may be used for either input or output in the design. However, impedances and impedance matching may vary between Port 1 and Port 6. 2, so that the filter must always be installed in one direction per the circuit design.
