

Dear Design Professional,

Following the release of Intel® Quartus® Prime software v20.1 on April 13, 2020, support for Arm\* Development Studio 5 (Arm\* DS-5) was dropped from the Intel Quartus Prime Pro and Standard edition software.

The following development kit part numbers include an Arm DS-5 license serial number – these have become invalid after the Intel Quartus Prime software v20.1 release.

Development Kit	OPN
Cyclone® V SoC Development Kit	DK-DEV-5CSXC6N
Intel® Arria® 10 SoC Development Kit	DK-SOC-10AS066S-A
Intel® Stratix® 10 SX SoC L-Tile Development Kit (L-Tile)	DK-SOC-1SSX-L-A
Intel Stratix 10 SX SoC H-Tile Development Kit (H-Tile)	DK-SOC-1SSX-H-A

**ESW-DS-FIX** must be purchased separately to receive an Arm\* Development Studio for Intel® SoC FPGA (Arm\* DS for Intel SoC FPGA) license serial number, which will be the replacement product for Arm DS-5.

For more information about Arm DS for Intel SoC FPGA, visit the websites below:

<https://www.intel.com/content/www/us/en/software/programmable/soc-eds/ds-5-toolkit.html>

Customers who have purchased any of the above development kits before April 13, 2020 will continue to have access to Arm DS-5 with the Intel Quartus Prime software v19.4 and previous releases, with support for up to one year under the terms of Arm's license agreement.

Sincerely,

Alyanna Castillo
