Temperature Re-rating Curve

Note:
Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

Average Time Current Curves

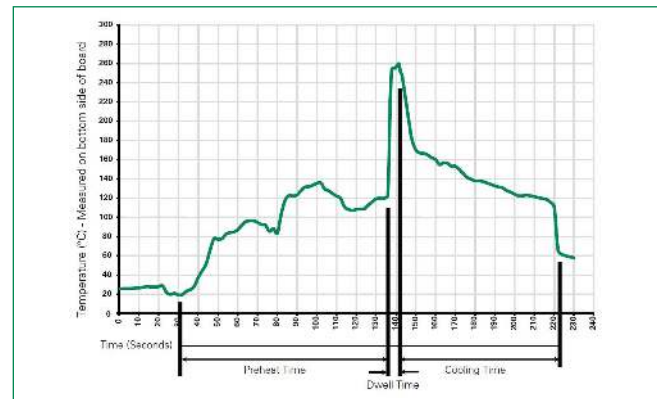

Note:
For 50A, 60A rating, it may not break current consistently when overload current is less than 200%In (represented by dotted portion of this time-current curve), as maybe arc current continuously pass-through fuse under this condition. Do not recommend to use conditions of below 200%In overload.
