0.5 mm Pitch, 1.0 mm above the board Top and Top/Bottom Contact, Back-Flip actuator Flexible Printed Circuit & Flexible Flat Cable ZIF Connectors

FH34(S)Series

Features

1. Low-profile

With the 1.0 mm above the board and width of 3.8 mm the connectors are used in space saving applications.

2. Increased FPC/FFC retention

As compared with existing similar construction connectors: * In horizontal direction: Approximately 2.6 times * In vertical direction: Approximately 2 times

3. Unique Back-Flip rotating actuator The rotating actuator opens from the back of the connector, assuring reliable electrical and mechanical connection.

4. Easy FPC insertion and reliable electrical connection

Proven Flip Lock actuator allows easy insertion of FPC and provides a tactile sensation when fully closed, confirming complete electrical and mechanical connection.

5. Delivered with the actuator open

FPC/FPC can be immediately inserted without the need for the opening of the actuator.

6. Accepts standard FPC thickness

0.3mm thick standard Flexible Printed Circuit (FPC) can be used. This is the only ultra-low profile ZIF connector using standard FPC.

7. Compatible with existing connectors. FPC/FFC and PCB mounting patterns are the same as for the FH19SC Series (bottom contact), allowing the use of both connectors for interconnections between two boards or replacement of the connectors.

8. Conductive traces on the PCB can run under the connector

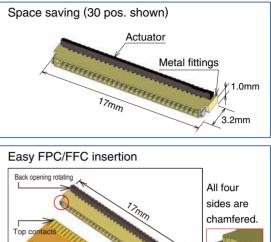

No exposed contacts on the bottom of the connector.

9. Board placement with automatic equipment Flat upper surface and tape and reel packaging facilitate vacuum pick-up and placement. Standard reel packaging contains 5000 connectors.

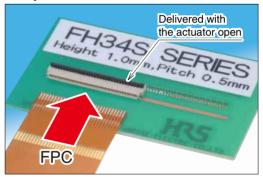

10.Halogen-free*

*As defined by IEC61249-2-21 Br-900ppm maximum, CI-900ppm maximum, CI + Br combined-1,500ppm maximum

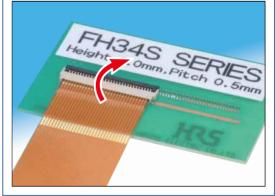

Increased FPC/FFC holding force

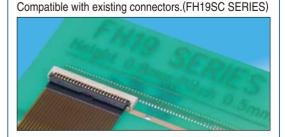

Ready to insert FPC/FFC

FPC/FFC inserted and retained. Completed electrical and mechanical connection.

Specifications

Potingo	Current rating 0.5 A (Note 1)	Operating temperature range: -55 to +85°C (Note 1)	Storage temperature range: -10 to +50°C (Note 2)
Ratings	Voltage rating 50 Vrms AC	Operating humidity range: Relative humidity 90% max. (No condensation)	Storage humidity range: Relative humidity 90% max. (No condensation)

Recommended FPC/FFC Thickness: 0.3 \pm 0.03 mm, Gold plated contact pads

Item	Specification	Conditions
1. Insulation resistance	500 MΩ min.	100 V DC
2. Withstanding voltage	No flashover or insulation breakdown	250 Vrms AC / one minute
3. Contact resistance	100 m Ω max. * Including FPC and FFC conductor resistance	1 mA, AC / DC 20mV max (AC: 1kHz)
4. Durability	Contact resistance: 100 m Ω max. No damage, cracks, or parts dislocation	20 cycles
5. Vibration	No electrical discontinuity of 1μ s or longer Contact resistance: 100 m Ω max. No damage, cracks, or parts dislocation	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 10 cycles in each of the 3 axis
6. Shock	No electrical discontinuity of 1μ s or longer Contact resistance: 100 m Ω max. No damage, cracks, or parts dislocation	Acceleration of 981m/s ² , 6 ms duration, sine half- wave, 3 cycles in each of the 3 axis
7. Humidity (Steady state)	Contact resistance: $100 \text{ m}\Omega \text{ max}$. Insulation resistance: $50 \text{ M}\Omega \text{ min}$. No damage, cracks, or parts dislocation	96 hours at 40°C and humidity of 90 to 95%
8. Temperature cycle	Contact resistance: $100 \text{ m}\Omega \text{ max}$. Insulation resistance: $50 \text{ M}\Omega \text{ min}$. No damage, cracks, or parts dislocation	$\begin{array}{cccc} \text{Temperature} & : -55^\circ\text{C} \rightarrow +15^\circ\text{C} \text{ to } +35^\circ\text{C} \rightarrow +85^\circ\text{C} \rightarrow +15^\circ\text{C} \text{ to } +35^\circ\text{C} \\ \text{Time:} & 30 \rightarrow 2 \text{ to } 3 \rightarrow 30 \rightarrow 2 \text{ to } 3 \text{ minutes} \\ \text{5 cycles} \end{array}$
9. Resistance to soldering heat	No deformation of components affecting performance	Reflow: At the recommended temperature profile Manual soldering: $350^{\circ}C \pm 5^{\circ}C$ for 5 seconds (Note 3)

Note1: When passing the current through all of the contacts, use 70% of the rated current.

Note2: Includes temperature rise caused by current flow.

Note3: The term "storage" refers to products stored for a long period prior to mounting and use. The operating temperature and humidity range covers the non-conducting condition of installed connectors in storage, shipment or during transportation after board mounting.

Materials

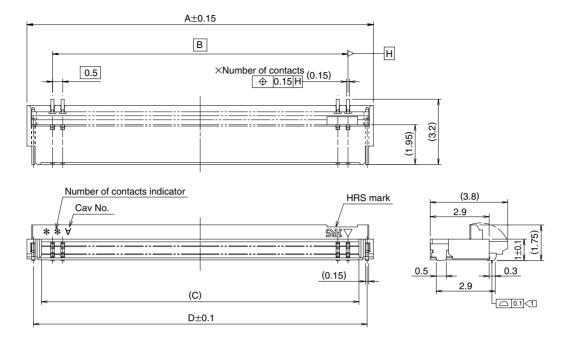

Part	Material	Finish		Remarks	
Insulator	LCP	FH34S series	Color:Beige		
	LCF	FH34SRJ series	Color:Gray	UL94V-0	
	PA	FH34S series	Color:Black	01940 0

Tape and reel packaging (5,000 pieces/reel, 500 pieces/reel). Order by number of reels.

Recommended PCB mounting pattern and metal mask dimensions

Recommended FPC/FFC Dimensions

Note 1 : Stiffener dimension should be 2.5mm min., and H dimension should be 0.5mm for improved flexibility of FPC. Note 2 : When using the FPC/FFC in FH34S or FH19SC connectors, the exposed area inserted in either connector is 2.5mm ± 0.3mm and the stiffener is 3.5mm min.

F

Recommended FPC construction

• Contact FPC manufacturer for specific details.

1. Using Single-sided FPC

2. Using Double-sided FPC

FPC : Flexible Printed Ci	rcuit
---------------------------	-------

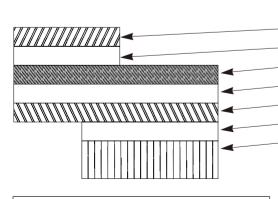

Material Name	Material		Material Thickness (µm)
Covering film layer	Polyimide 1 mil thick		(25)
Cover adhesive			(25)
Surface treatment	, , ,	old plated over 1 ckel underplating	3
Copper foil	Cu	1oz	35
Base adhesive	Thermosettir	ng adhesive	25
Base film	Polyimide	1 mil thick	25
Reinforcement material adhesive	Thermosettir	ng adhesive	35
Stiffener	Polyimide	7 mil thick	175
	Total		298

FPC : Flexible Printed Circuit

	Material Name	Material	Material Thickness (µm)
	Covering layer film	Polyimide 1 mil thick	(25)
	Cover adhesive		(25)
	Surface treatment	$0.2\mu m$ thick gold plated over 1 to $5\mu m$ thick nickel underplating	3
())))))))))))))))))))))))))))))))))))	Through-hole copper	Cu	15
	Copper foil	Cu 1/2oz	18
****	Base adhesive	Thermosetting adhesive	18
	Base film	Polyimide 1 mil thick	25
	Base adhesive		18
	Copper foil	Cu 1/2oz	(18)
	Cover adhesive	Thermosetting adhesive	25
	Covering film layer	Polyimide 1 mil thick	25
	Reinforcement material adhesive	Thermosetting adhesive	50
	Stiffener	Polyimide 4 mil thick	100
		Total	297

* To prevent release of the FPC due to its bending, use of the double sided FPC with copper foil on the back side is not recommended.

3. Using FFC

FFC : Flexible	Flat Cable

Material Name	Material Name Material	
Polyester film		(12)
Adhesive	Thermoplastic polyester	(30)
Gold plated annealed copper foil		35
Adhesive	Polyester	30
Polyester		12
Adhesive	Polyester	30
Stiffener	Polyester	188
	Total	295

4. Precautions

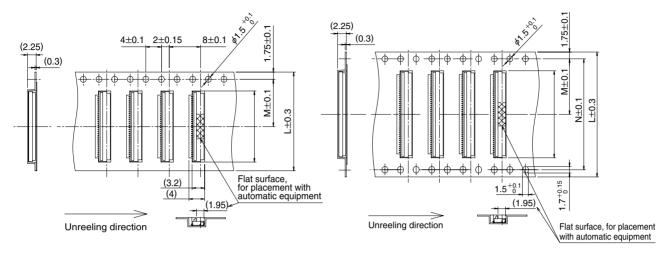

1. This specification is a recommendation for the construction of the FH34S Series FPC and FFC (t=0.3 \pm 0.03).

2. For details about the construction, please contact the FPC/FFC manufacturers.

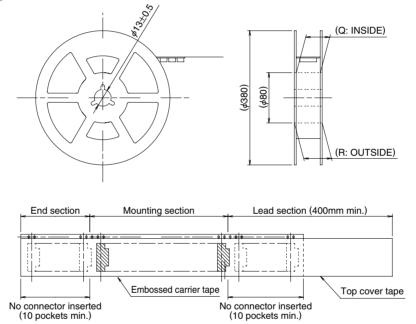

■Packaging Specification

• Embossed Carrier Tape Dimensions (Tape width 24mm max.)

• Embossed Carrier Tape Dimensions (Tape width of 32mm min.)

Reel Dimensions

Operation and Precautions

Exercise care when handling connectors. Follow recommendations given below.

Operation	Precautions	
1. As delivered Delivered with the actuator open. There is no need to operate the actuator prior to inserting the FPC/FFC.	 Do not close the actuator without the FPC/FPC inserted. 	
2. FPC/FFC insertion (The top contact specification) Insert the FPC/FFC with the conductive surfaces facing up. Align the FPC/FFC straight with the connector and insert it firmly all the way.	 The contacts are making connection with the FPC/FFC pads from the top. Do not insert the FPC/FFC with the pads facing down. When inserting the FPC/FFC do not twist it. Insert straight. Improper insertion may cause deformation of the contacts and connection failures. Be sure to insert the FPC/FFC when the actuator is fully open. 	
3. Locking After FPC/FFC insertion, rotate the actuator down to a full stop, pushing it at the center. $\overbrace{K}{}$	<text></text>	
4. FPC/FFC removal (Lock release) Carefully rotate the actuator up to 90°, lifting it at the center.	 Do not operate the actuator from one end only. The actuator opens only 90°. Do not attempt to open it past this angle or grasp it. During the opening of the actuator do not press it toward the connector body. Rotate up at the center. 	
RaiseLift at the center	34S SE 1. cm, Pite	

HS 7

Precautions at the Design Stage

- (1) Route the FPC/FFC so that a direct pull force
- (2) Make sure that there is enough space to insert/remove the FPC/FFC straight.
- (3) Follow the recommendations given in this catalog in regard to mounting pattern, metal mask dimensions and FPC/FFC mating dimensions.
- (4) Consult the manufacturer of the FPC/FFC for the details on the flexibility of the specific FPC/FFC.
- (5) When designing the board lay-out and spaces in the device assure that there is enough clearances for the actuator to fully open/close.

Precautions when mounting connectors on the PCB

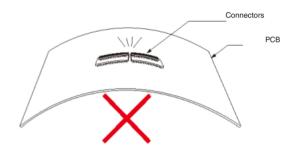

Handling before mounting on PCB

Insertion of the FPC/FFC or operation of the actuator prior to mounting on the PCB is not recommended.

♦PC board warpage

Minimize the warpage as much as possible. The connector are straight within 0.1 mm max. Make sure that the mounting area flatness can accept the connector terminals without causing any failure of the solder joints.

- Forces on the board
- When braking the large PC board into individual boards exercise care not to damage the installed connectors.
- ◆When attaching the boards or other components with the screws make sure that any stresses will not cause board deflections affecting the mounting areas of the connector.

When hand soldering:

 \cdot Do not perform hand soldering with the FPC inserted in the connector.

* Do not apply excessive heat or touch the soldering iron anywhere other than the connector leads.

* Do not use excessive amount of solder or flux compounds.

Operation of the actuator or contacts may be affected by excessive amounts of solder or flux compounds.

Temperature Profile

HRS test condition

Solder method	:	Reflow, IR/hot air
Environment	:	Room air
Solder composition	:	Paste, 96.5%Sn/3.0%Ag/0.5%Cu
		(Senju Metal Industry, Co., Ltd.'s Part
		Number:
		M705-221CM5-42-10.5)
Test board	:	Glass epoxy
		25mm×40mm×0.8mm thick
Land dimensions	:	0.3mm×0.8mm
Metal mask	:	0.25×0.65×0.1mm thick

The temperature profiles shown are based on the above conditions.

In individual applications the actual temperature may vary, depending on solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.
