SGSA-MCB Series **Connection** Box
BANNER®
more sensors, more solutions

Datasheet

Use the SGSA-MCB Muting Connection Box as a muting accessory for the Banner SGS Safety Grid System with Integral Muting.

Banner SGS muting sensors can be connected directly to the muting connection box.

The muting connection box connects to the dedicated 5-pin M12 muting connector on the SGS Receiver of an Emitter/Receiver system or Active side of an Active/Passive system.

Aside from the green LEDs that indicate sensors output status, the SGSA-MCB does not contain any electronic elements and is therefore not subject to any safety classification.

- Supply and switching voltage +24 V DC
- M12 connection
- Simple connection to safety light curtains.

For correct LED operation, you must use identical sensors for the four M12 sockets.

Models

Model	Description
SGSA-MCB	Connection Box
SGSA-MCB-HW	Optional hardware kit for mounting Connection Box to the t-slot of SGS Receiver or Active unit.

Specifications

Supply Voltage
+24 V dc ± 20%

Maximum Current Load
1 A

Construction
Black PVC (UL Recognized) housing and cable (C1); 5-pin M12 A-Coding female cable connector (C2); 5-pin M12-5P A-Coding female socket housing connector

Insulating Resistance
>10^9 Ω

Environmental **Rating**
IEC IP65; To maintain the IEC IP65 rating, use the included dust cap on all unused connectors.

Operating Temperature
−10 °C to +55 °C (+14 °F to +131 °F)

Storage Temperature
−25 °C to +70 °C (−13 °F to +158 °F)
