### Description

Pasternack carries a wide selection of power dividers to fit your needs. These components are essential in many systems, allowing the combination of multiple signals or splitting of a single signal into multiple signals with equal magnitude and phase. Pasternack's resistive and reactive power dividers come with excellent performance featuring minimal loss, high isolation and low VSWR. They are available in both narrow and broad bandwidths with a variety of connector types. The PE20DV013 is a 2 way reactive power divider that operates from 1 to 4 GHz and can handle up to 20 Watts (CW). This SMA power divider offers 20 dB min isolation and 1.3:1 max VSWR. The package interface uses SMA inputs on all of the ports.
