micro:bit accessories kit

Handy accessories to get you started with micro:bit!

This dandy little kit has a battery pack for portable projects, and a micro-USB cable to connect your micro:bit to your computer to start your coding adventures.

The battery pack contains two AAA batteries and has a switch to turn the power on and off. It connects to your micro:bit with the attached JST adaptor.

The micro-USB cable connects your micro:bit and your computer ,and provides power and data (for coding) connections. Easy!

Please note: colour of micro-USB cable may vary!
