Warning

- 1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
- 2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

Caution

1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.

Spec No.	Part No.	Page
TQ3C-8EAF0-E1YAQ08-00	TCG101WXLPAANN-AN20	1

1. Application

This document defines the specification of TCG101WXLPAANN-AN20. (RoHS Compliant)

2. Construction and outline

LCD	: Transmissive color dot matrix type TFT
Backlight system	: LED
Polarizer	: Anti-Glare treatment
Interface	: LVDS
Additional circuit	: Timing controller, Power supply (3.3V input)
	: Constant current circuit for LED Backlight(12V input)

3. Mechanical specifications

Item	Specification	Unit
Outline dimensions 1)	236(W)×(156.8)(H)×9.4(D)	mm
Active area	216.96(W)×135.6(H) (25.6cm/10.1 inch(Diagonal))	mm
Dot format	1280×(R,G,B)(W)×800(H)	dot
Dot pitch	0.0565(W)×0.1695(H)	mm
Base color 2)	Normally White	-
Mass	500	g

1) Projection not included. Please refer to outline for details.

2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

4. Absolute maximum ratings

Item			Symbol	Min.	Max.	Unit
Supply voltage(+3.3V)			V_{DD}	-0.3	4.0	V
Supply voltage(+12V)			VIN	-0.3	14.0	V
		RxINi+, RxINi- (i=0,1,2,3)	V_{I1}	-0.3	2.8	V
Input signal	.l 1)	CK IN+, CK IN-	V_{I2}	-0.3	2.8	V
Voltage		SELLVDS, BITSEL, SC	V _{I3}	-0.3	V_{DD} +0.5	V
		BLBRT, BLEN	V_{I4}	-0.3	V _{IN}	V

4-1. Electrical absolute maximum ratings

1) V_{DD} must be supplied correctly within the range described in 5-1.

4-2. Environmental absolute maximum ratings

Item		Symbol	Min.	Max.	Unit
Operating temperature	1)	Top	-20	70	°C
Storage temperature	2)	$T_{\rm STO}$	-30	80	°C
Operating humidity	3)	Hop	10	4)	%RH
Storage humidity	3)	Hsto	10	4)	%RH
Vibration		-	5)	5)	-
Shock		-	6)	6)	-

1) Operating temperature means a temperature which operation shall be guaranteed. Since display performance is evaluated at 25°C, another temperature range should be confirmed.

- 2) Temp. = -30°C < 48h , Temp. = 80°C < 168h
 Store LCD at normal temperature/humidity. Keep them free from vibration and shock. An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard. (Please refer to "Precautions for Use" for details.)
- 3) Non-condensing
- 4) Temp.≦40°C, 90%RH Max.
 - Temp.>40°C, Absolute humidity shall be less than 90%RH at 40°C.
- 5)

Frequency	$10{\sim}55~{\rm Hz}$	Acceleration value
Vibration width	0.15mm	$(0.3 \sim 9 \text{ m/s}^2)$
Interval	10-55-10	Hz 1 minutes

2 hours in each direction X, Y, Z (6 hours total) EIAJ ED-2531

 6) Acceleration: 490 m/s², Pulse width: 11 ms 3 times in each direction: ±X, ±Y, ±Z EIAJ ED-2531

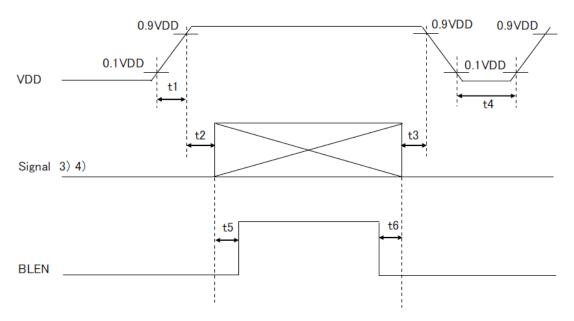

5. Electrical characteristics

5-1. LCD

10. Warranty

10-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

10-2. Production warranty

Kyocera warrants its LCD's for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCD's that are shown to be Kyocera's responsibility.

11. Precautions for use

- 11-1. Installation of the LCD
- 1) Please ground in order to stabilize brightness and display quality.
- 2) A transparent protection plate shall be added to protect the LCD and its polarizer.
- 3) The LCD shall be installed so that there is no pressure on the LSI chips.
- 4) The LCD shall be installed flat, without twisting or bending.
- 5) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

11-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

11-3. LCD operation

1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.

11-4. Storage

- The LCD shall be stored within the temperature and humidity limits specified. Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

11-5. Usage

- 1) <u>DO NOT</u> store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not disassemble LCD because it will result in damage.
- 7) This Kyocera LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 8) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 9) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

12. Reliability test data

Test item	Test condition	Test time	Judgement		
High temp. atmosphere	80°C	240h	Display function Display quality Current consumption	: No defect : No defect : No defect	
Low temp. atmosphere	-30°C	240h	Display function Display quality Current consumption	: No defect : No defect : No defect	
High temp. humidity atmosphere	40°C 90% RH	240h	Display function Display quality Current consumption	: No defect : No defect : No defect	
Temp. cycle	-30°C 0.5h R.T. 0.5h 80°C 0.5h	10cycles	Display function Display quality Current consumption	: No defect : No defect : No defect	
High temp. operation	70°C	500h	Display function Display quality Current consumption	: No defect : No defect : No defect	

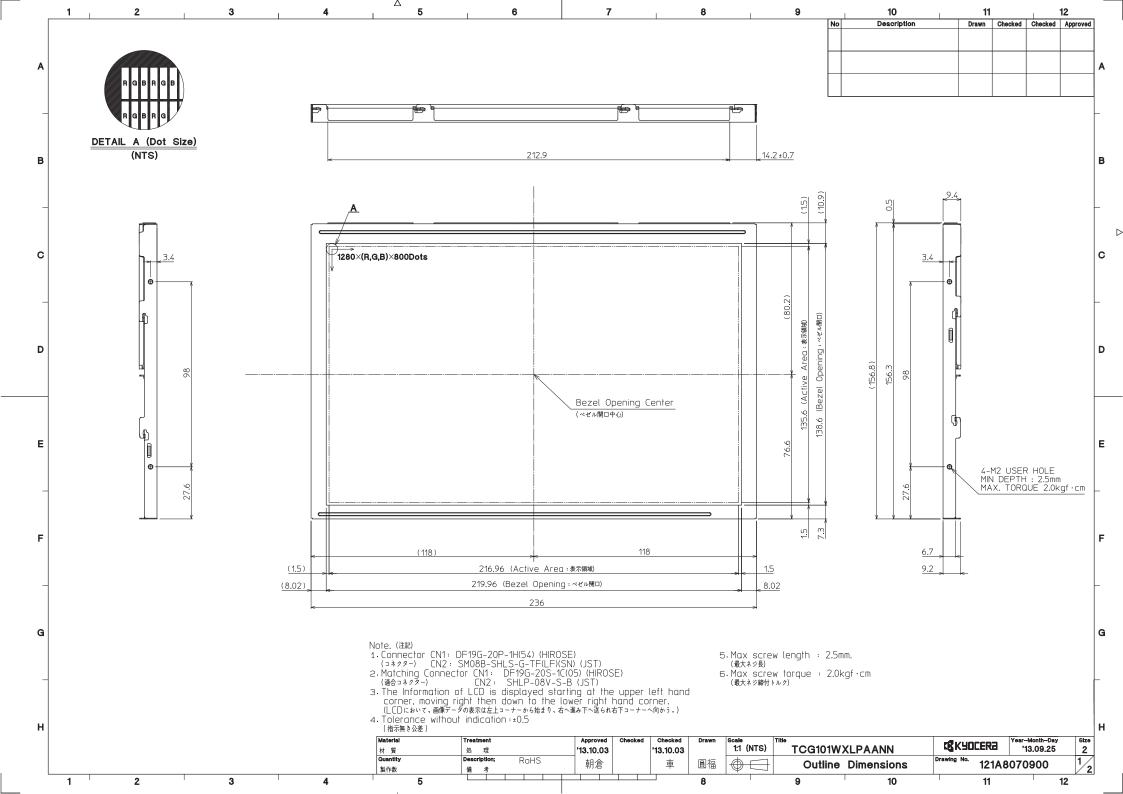

1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.

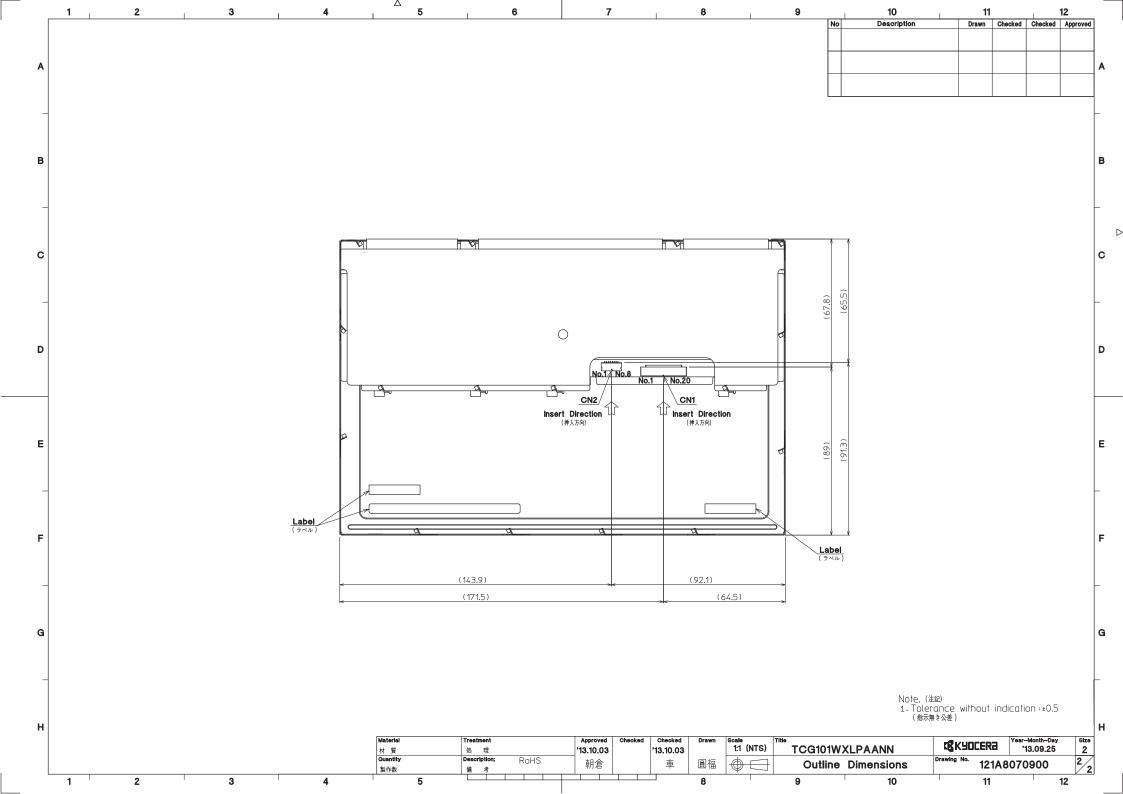

2) The LCD is tested in circumstances in which there is no condensation.

3) The reliability test is not an out-going inspection.

 The result of the reliability test is for your reference purpose only. The reliability test is conducted only to examine the LCD's capability.

1) Note	
	Note
General	1. Customer identified anomalies not defined within this inspection standard shall be
	reviewed by Kyocera, and an additional standard shall be determined by mutual
	consent.
	2. This inspection standard about the image quality shall be applied to any defect with
	the active area and shall not be applicable to outside of the area.
	3. Inspection conditions

	consent							
	2. This ins	pection standard about	t the image quality shall be applied to any defect within					
	the activ	ve area and shall not b	e applicable to outside of the area.					
	3. Inspecti	on conditions						
	Lumina	ince	: 500 Lux min.					
	Inspect	ion distance	: 300 mm.					
	Temperature		$:25 \pm 5^{\circ}$ C					
	Directio	on	: Directly above					
Definition of	Dot defect	Bright dot defect	The dot is constantly "on" when power applied to the					
inspection item			LCD, even when all "Black" data sent to the screen.					
			Inspection tool: 5% Transparency neutral density filter.					
			Count dot: If the dot is visible through the filter.					
			Don't count dot: If the dot is not visible through the					
			filter. R G B R G B R G B R G B R G B R G B R G B R G B R G B					
		Black dot defect	The dot is constantly "off" when power applied to the					
			LCD, even when all "White" data sent to the screen.					
		Adjacent dot	Adjacent dot defect is defined as two or more bright dot					
			defects or black dot defects.					
			R G B R G B R G B R G B R G B R G B R G B R G B C G B R G B R G B R G B C </th					
	External	Bubble, Scratch,	Visible operating (all pixels "Black" or "White") and non					
	inspection	Foreign particle	operating.					
		(Polarizer, Cell,						
		Backlight)						
		Appearance	Does not satisfy the value at the spec.					
		inspection						
	Definition	Definition of	circle size Definition of linear size					
	of size	a d =(a +

2) Standard

Classification Ins		Inspect	ion item	Judgement standard				
Defect	Dot	Bright dot		Acceptable number	č			
(in LCD	defect	0				: 5 mm	or more	
glass)		Black dot o	defect	Acceptable number		: 5		
0				Black dot spacing		5 mm or more		
		2 dot join Bright dot defect		Acceptable number		:2		
		Black dot defect		Acceptable number		: 3		
		3 or more o	dots join	Acceptable number		:0		
		Total dot d	efects	Acceptable number		÷5 Maz	X	
	Others	White dot,	Dark dot					
		(Circle)		Size (mm	l)	Ac	ceptable number	
				d ≦	0.2		(Neglected)	
				$0.2 < d \leq$			5	
				$0.4 < d \leq$	0.5		3	
				0.5 < d			0	
External	inspection	Polarizer (Scratch)					
(Defect on	-			Width (mm)	Length (mm)	Acceptable number	
Polarizer	or			$W \leq 0.1$			(Neglected)	
between F	Polarizer			$0.1 < W \leq 0.3$	L ≦	≦ 5.0	(Neglected)	
and LCD	glass)			$0.1 < W \ge 0.3$	5.0 < L		0	
	0			0.3 < W –			0	
		Polarizer (Bubble)						
				Size (mm)		Acceptable number		
				$d \leq 0.2$		(Neglected)		
				$0.2 < \mathrm{d} \leq \mathrm{d}$			5	
				$0.3 < d \leq 0.5$		3		
				0.5 < d		0		
		Foreign pa	rticle					
		(Circular shape)		Size (mm)		Acceptable number		
				d \leq 0.2		(Neglected)		
				$0.2 \ < \ d \ \le \ 0.4$		5		
				$0.4 < d \leq 0.5$		3		
				0.5 < d		0		
		Foreign pa	rticle					
		(Linear shape)		Width (mm)	Length	(<u>mm</u>)	Acceptable number	
		Scratch		W \leq 0.03			(Neglected)	
						≤ 2.0	(Neglected)	
				$0.03 < W \leq 0.1$	2.0 < L	≦ 4.0	3	
					4.0 < L		0	
				0.1 < W	-		(According to	
							circular shape)
