

TOOL NEWS

Wrench and Plier in one tool

Plier Wrench **SB 183 10 JC**

Made in Austria

One tool
**that works like a
wrench and pliers**

Quick and easy adjustment
by sliding mechanism

ideal and ergonomic adjustment
of the hand position

careful assembly for delicate surfaces
through paralleled, smooth jaws

NEW

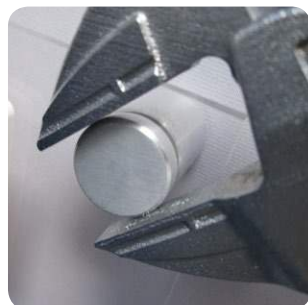

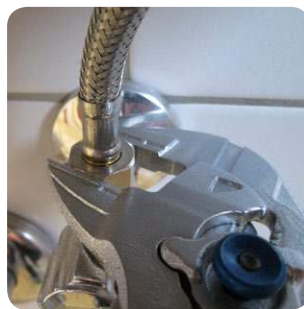

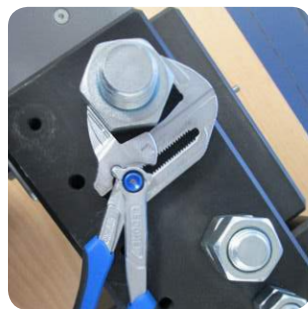

- 1 Careful assembly of bolt connections with delicate surfaces (e.g. chrome-plated fittings) through smooth paralleled jaws
- 2 Sliding mechanism for quick and easy adjustment of the size
- 3 Excellent pressing and clamping force thanks to the extremely high transmission (>1:10)
- 4 Can also be used as a ratchet spanner thanks to the clever combination of wrench and pliers

Plier Wrench

SB 183 10 JC

- › One tool that works like a wrench and pliers
- › DIN ISO 5743
- › Can replace two complete wrench sets, metric and imperial (0 - 50mm or 0 - 1 7/8")
- › Careful assembly of bolt connections with delicate surfaces (e.g. chrome-plated fittings)
- › Adjustable universal tool for bolting tasks
- › Perfect for bending, holding, pressing and gripping a wide range of workpieces
- › Play-free positioning with no risk of damaging the edges
- › Sliding mechanism and paralleled jaws for quick and easy adjustment, practically stepless
- › Secure locking of the setting when the size of the opening is selected

- › Sliding mechanism may be activated from almost any setting
- › May be used as a „ratchet spanner“ – quick and easy tightening and loosening of hexagonal screws and nuts
- › High transmission (>1:10) for high pressing and clamping force against the jaws
- › Made of GEDORE special hardened and tempered steel for the highest loads
- › May be used as a powerful vice when out and about
- › Optimum ergonomic adjustment of the hand position to the size of the jaw or spanner opening
