

Are you protecting your repairs against corrosion?

With today's ever evolving substrates being used in automotive construction, industry organizations and OEMs alike specify the use of cavity wax to prevent corrosion.

3M™ Cavity Wax Plus 08852 is a simple and effective way to ensure corrosion protection, one of the most important parts of automotive repairs.

1,500 hours salt spray results

Actual panel test results ASTM B117 1,500 hours.

Without protection

(3 coats)

Are you taking the steps to prevent corrosion today?

According to I-CAR® Corrosion Protection CPS01 the use of cavity wax is recommended post repair. In addition, numerous OEMs call for the use of a corrosion protection product during vehicle repair.

3M™ Cavity Wax Plus 08852

Non-hardening corrosion protection for internal cavities in a convenient aerosol can.

- Self-healing, corrosion protection for inner body panels, frame rails and structural enclosures.
- When used according to directions 3M™ Cavity Wax Plus delivers the right amount of flow and wicking, providing consistent and uniform protection for your repair.
- Eliminates the need for using antiquated and messy bulk spray technology to apply corrosion protection to a vehicle.
- Provides access to inner body structures with tight tolerances.

Part No.	Size	Product	Case Qty.
08852	18 oz. aerosol	3M™ Cavity Wax Plus	4

3M™ Cavity Wax Plus Applicator Wand Kit 08851

Protect hard-to-reach places.

- 3M™ Cavity Wax Plus Applicator Wand Kits provide three great options (8", 24" and 34") to access hard-to-reach places when applying corrosion protection coatings (inner rocker panels, dog legs, unside constructions, frame rails, etc.).
- 24" and 34" wands provide a uniform 360 degree spray pattern to ensure that you are maximizing coverage with each application.
- 8" tube delivers a powerful stream of material to flood joints and seal them from corrosive elements.
