Part Number : TPG100006 - Softlog ICP2GANG-DS Production Quality ICSP Secure GANG Programmer

The ICP2GANG-DS Production Quality ICSP Secure GANG Programmer is a 4-channel in-circuit programmer (expandable up to 64 channels) that operates with a PC or as a standalone unit and simultaneously programs 8-bit PIC® MCUs and serial EEPROMs. The secure programming feature dramatically reduces the risk of unauthorized reconstruction of hex files, and also limits how many times the hex file can be programmed. It features ultra fast programming, 250mA Vdd drive current (per channel), programmable Vdd (2.0 to 5.5V) and Vpp (2.0 to 13.5V), programmable delay between Vdd and Vpp (0.1 to 250 ms), programmable clock/data speed (500KHz to 2.5 MHz), on-board 1MByte flash memory (per channel) and Windows® DLL functions and command-line interface for high volume automatic programming.
