

Round Black Zipper Case

PRODUCT ID: 3921

How many pockets does an OTG (On The Go) maker need to carry their boards, wires, miscellanea when away from their desk? The world may never know.

We get serious satisfaction when things fit into other things, so we fell in love with this zipper case as it is the exact perfect size for a Circuit Playground Express!

There's even a little inside pocket that you can use to stash accessories like USB cables, alligator clips, jumper wires, extra batteries, etc! Perfect handheld size and heft and pops easily into your bag, purse, or pocket.

This case will easily fit your round whos-its and whats-its galore under 68mm diameter and 32mm thick (you can go thicker if you don't use the pocket).

Comes in classic Adafruit Black
