

HUB

Description

HUB is one of the six Units in M5CO, allowed buy separately. This Units is used for I2C port expanding. Notice: HUB is just a hardware expander, if you are looking for hardware and software(standard protocol) expander like I2C Single-bus, please check PaHUB or PiHUB. If you connected two I2C slave devices onto HUB that share the same address, you will have problem getting I2C data from both.

Product Features

- GPIO Baseboard
- Two I2C-compatible buses
- Product Size: 22.2mm x 21.2mm x 11mm
- Product weight: 4.5g

Include

- 1x HUB Unit
- 1x Grove Cable

Schematic
