SGP13N60UF

Ultra-Fast IGBT

General Description

Fairchild's UF series of Insulated Gate Bipolar Transistors (IGBTs) provides low conduction and switching losses. The UF series is designed for applications such as motor control and general inverters where high speed switching is a required feature.

Features

- · High speed switching
- Low saturation voltage : $V_{CE(sat)} = 2.1 \text{ V } @ I_C = 6.5 \text{A}$
- · High input impedance

Applications

AC & DC motor controls, general purpose inverters, robotics, and servo controls.

Absolute Maximum Ratings T_C = 25°C unless otherwise noted
