

Disc type capacitors with leads

High voltage ceramic capacitors, commercial grade, safety standard approved

# CD45 series

## FEATURES

- Compliant with IEC and the safety standards of various countries.
- CD45 series meets reinforced insulation's safety standards. Since the withstand voltage is 4,000V AC, single-unit configuration is available for European class II devices.
- Flame-resistant reinforced outer insulation prevents fires, electrical shock, and other potential hazards.
- Conform to RoHS directive due to lead(Pb) free of lead-wire and internal solder material.
- Compatible with halogen-free external resin coating.

## APPLICATION

Y capacitor for AC adapter, charger, power supplies

## PART NUMBER CONSTRUCTION

CD45	-E	2GA	102	M	-	□	K	A					
Series name*	Temperature characteristics	Rated voltage		Nominal capacitance		Capacitance tolerance		Lead-wire type	Application classification	Internal code			
SL	+350 to -1,000ppm/°C	2GA	X1: 440V AC Y1: 400V AC	100	10pF	J	±5%	G	Long lead	K	Safety standard approved	A	Halogen-free
-B	±10%			102	1,000pF	K	±10%	N	Short lead				
-E	+20, -55%			222	2,200pF	M	±20%	V	Taping				

\* Please refer to P-3 about the product dimensions.

## OPERATING TEMPERATURE RANGE

Temperature characteristics	Operating temperature (°C)	Storage temperature (°C)*
SL	-40 to 125	-40 to 125
B	-40 to 125	-40 to 125
E	-40 to 125	-40 to 125

The maximum operating temperature of +125°C includes capacitor self-generated heat of up to 20°C.

\* After capacitor is mounted on board, the storage temperature range is applied.

## STANDARD LEAD-WIRE SHAPES

Dimensions in mm

TDK's standard product is vertical kink. TDK recommends short leads for bulk products.

\*1 Body diameter (D) is reference value if D is smaller than maximum dimension of lead to lead distance (F).

\*2 Coating on leads shall not extend beyond the bottom of vertical kink.

○ RoHS Directive Compliant Product: See the following for more details. <https://product.tdk.com/en/environment/rohs/index.html>

○ Halogen-free: Indicate that Cl content is less than 900ppm, Br content is less than 900ppm, and that the total Cl and Br content is less than 1500ppm.

## REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

### SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

#### REMINDERS

- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Before soldering, be sure to preheat components.  
The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.  
If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.  
The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.  
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.

- Please refer to the guideline of notabilia for fixed ceramic capacitors issued by JEITA(Japan Electronics and Information Technology Association, EIAJ RCR-2335).

This guideline describes general precautions\* for using fixed ceramic capacitors. Please carefully confirm it and use capacitors safely.

\* Items for check, explanation/reason/concrete example and failure examples, etc.

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.
