

# DD/DS CONNECTOR

2.0 mm pitch/Board-in Insulation displacement connectors

The DD and DS right angle board-in insulation displacement connectors measure just 3.5 mm in mounting height and 4.3 mm in width. Since these right angle connectors are connected to wires running parallel to the printed circuit board, electronic equipment can have a lower profile. These connectors are suited for the high density wiring of electronic products.

- Compact and low profile
- Twin U-slot insulation displacement section
- Compliant locking solder tails
- Strain relief

## PC board layout and Assembly layout

Note: 1. The above figure is the figure viewed from soldering side.  
2. Tolerances are non-cumulative:  $\pm 0.05\text{mm}$  for all centers.  
3. Hole dimensions differ according to the type of PC board and piercing method. The dimensions above should serve as a guideline. Contact JST for details.

4. Pulling or otherwise putting a strain on the harness attached to the connector before the solder has completely cooled can dislodge the connector or cause its misalignment.
5. Do not reuse any connectors that were previously soldered to and then removed from a PC board.
