Product Longevity Program

Program Overview

California Eastern Laboratories, Inc. is pleased to announce the Product Longevity Program to our customers purchasing Renesas Electronics products. The parts selected for participation in this program are planned to have a long production life cycle.

Planned Life Cycle for PLP Products

Program Details

1. Products participating in this program are expected to have a long product life.
2. A list of the products participating in this program is provided via the link below.
3. The products in this program are clearly identified with the PLP icon .
4. Due to various circumstances, in some cases a PLP product may be replaced by an equivalent product that is also in the PLP.
5. PCN (Product Change Notices) for changes in product specifications, manufacturing facilities, or materials may be issued due to circumstances beyond our control even while this program is in effect.
6. The date of PLP termination is the date that was planned at the point in time when it was officially announced. It is subject to change.
