

## 50 Feet 9-Conductor (24AWG) Stranded-Shielded Bulk Cable

### M110-9C24G-50

These 24AWG (American Wire Gauge) 9 bare copper conductor RS-232 multiconductor cables are used to create serial patch cables for a wide variety of applications, usually for computer peripherals.

RS-232 is a precursor to USB and is used for many of the same devices, such as printers, as well as modems.

RS-232 is also commonly used for sophisticated machinery in laboratories, automated manufacturing plants, and other hi-tech environments.

**100% Overall Foil Shield.**

**Specifications/Contents:**

**Model: M110-9C24G-50**

**Length: 50 ft**

**Weight: 2 lbs**

**Outer Diameter: 5.9 mm**

**without us, you are just not connected! ■**
