RMK-5-751+

50Ω Output 500 to 750 MHz

# The Big Deal

- High rejection of adjacent harmonics, >60 dBc
- 50  $\Omega$  in/out, no tuning necessary

CASE STYLE: TT1224

## **Product Overview**

The RMK-5-751+ is a cost-effective X5 frequency multiplier that utilizes specially selected silicon Schottky diodes and compatible filter circuitry to achieve a low conversion loss, yet have a high rejection of unwanted harmonics near its F5 output. It makes the RMK-5-751+ ideal for a wide range of applications. The tiny plastic case, 0.25" x 0.31" x 0.16" high, is aqueous washable and RoHS compliant.

| Feature  | Advantages  |
|--|---|
| <22 dB conversion loss   | Efficient choice for converting 100 MHz source to 500 MHz output while maintaining useful signal power, especially for reference crystal oscillators. Only 12 dBm input required for -10 dBm output, especially useful for low-loss systems such as instrumentation |
| >60 dB rejection of F4 and F6                                  | Proprietary internal circuitry achieves high suppression and minimizes filter requirements for undesired signals, as in wireless Tx/Rx applications including broadcast TV, SAP/SAB, medical telemetry, and PMR   |
| Internally balanced to $50\Omega$ in/out, no DC power required | Saves PCB space and simplifies application design, with no external matching or biasing circuits required   |
| Small surface mount package                                    | Easily integrated in systems with minimal PCB area available  |

#### Notes

A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.

B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.

C. The parts covered by this specification document are subject to Mini-Circuit standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits website at www.minicircuits.com/MCLStore/terms.jsp

### Demo Board MCL P/N: TB-393 Suggested PCB Layout (PL-258)

TRACE WIDTH IS SHOWN FOR ROGERS ROA350B WITH DIELECTRIC THICKNESS 0.30" ± .002". COPPER: 1/2 0Z. EACH SIDE. FOR OTHER MATERIALS TRACE WIDTH MAY MED TO BE MODIFIED. BOTTOM SIDE OF THE PCB IS CONTINUOUS GROUND PLANE. DENOTES PCB COPPER LAYOUT WITH SMOBC (SOLDER MASK OVER BARE COPPER.)

DENOTES COPPER LAND PATTERN FREE OF SOLDER MASK

- · low conversion loss, 22 dB typ.
- high adjacent harmonic rejection, F4, 60 dBc typ., F6, 67 dBc typ.
- aqueous washable

## Applications

- · synthesizers
- · local oscillators
- · satellite up and down converters
