

## FEATURES

- Guaranteed 10ppm/ $^{\circ}\text{C}$  Temperature Coefficient
- Guaranteed 1 $\Omega$  Maximum Dynamic Impedance
- Guaranteed 20 $\mu\text{V}$  Maximum Wideband Noise
- Wide Operating Current Range 0.6mA to 15mA

## APPLICATIONS

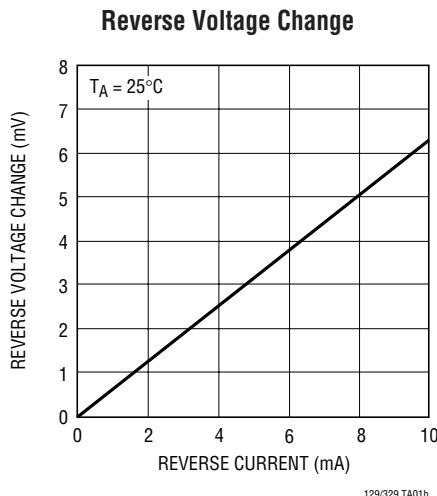

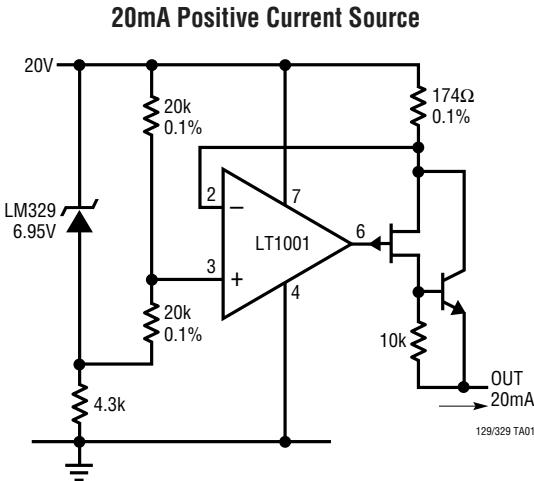

- Transducers
- A/D and D/A Converters
- Calibration Standards
- Instrumentation Reference

## DESCRIPTION

The LM129 temperature compensated 6.9V zener references provide excellent stability over time and temperature, very low dynamic impedance and a wide operating current range. The device achieves low dynamic impedance by incorporating a high gain shunt regulator around the zener. The excellent noise performance of the device is achieved by using a “buried zener” design which eliminates surface noise phenomenon associated with ordinary zeners. To serve a wide variety of applications, the LM129 is available in several temperature coefficient grades and two package styles. A 20mA positive current source application is shown below.

## TYPICAL APPLICATION

# LM129/LM329

## ABSOLUTE MAXIMUM RATINGS (Note 1)

Operating Temperature Range

LM129 (OBSOLETE) ..... -55°C to 125°C

LM329 ..... 0°C to 70°C

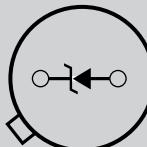

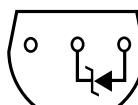

Storage Temperature Range ..... -65°C to 150°C

Lead Temperature (Soldering, 10 sec) ..... 300°C

Reverse Breakdown Current ..... 30mA

Forward Current ..... 2mA
