ATTENTION: This module has an API (Application Programming Interface) Specification that is under Japan export control. Depending on the customer's country and application (e.g. weapons), Taiyo Yuden may not be able to provide the API Specification to all customers. Please contact your local Taiyo Yuden sales office for additional information.

To contact your local sales office and for additional product information, please visit <http://www.ty-top.com>

Control No. HD-AG-A150123	(1/5)	Control name General Items
------------------------------	-------	-------------------------------

Scope

This specification ("Specification") applies to the hybrid IC "EYSGJNAWY-WX", a **Bluetooth**[®] 4.2 low energy module ("Product") manufactured by TAIYO YUDEN Co., Ltd. ("TAIYO YUDEN")

1. Type: EYSGJN

User Code: EYSGJNAWY-WX

*User Code may be changed for mass production or other cases.

2. Function:

Radio frequency module. **Bluetooth**[®] standard Ver 4.2 low energy conformity

3. Application: Health & Fitness Equipment, Sensor, Toys

4. Structure:

Hybrid IC loaded with silicon monolithic semiconductor

Compatible with industrial standard reflow profile for Pb-free solders

Can meet with RoHS compliance (Pb, Cd, Hg, Cr⁺⁶, PBB, PBDE)

5. Outline: 11.3 x 5.1 x 1.3 mm

28-pin Land Grid Array

6. Marking: Part number, Lot number

7. Features:

- Small outline by PCB substrate
- Low power consumption
- Integrated antenna
- Integrated system clock
- **Bluetooth**[®] 4.2 low energy conformity
- Slave or Master Role

8. Packaging:

Packaging method: Tape & reel + aluminum moisture barrier bag

Packaging unit: 2000

*It might be provided as tray at sample stage.

Control No. HD-AG-A150123	(2/5)	Control name General Items
------------------------------	-------	-------------------------------

9. Note:

- a. Any question arising from this Specification shall be solved through mutual discussion by the parties hereof.
- b. This Product is not designed to be radiation durable and should not be used under the circumstance of radiation.
- c. The operating conditions of this Product are as shown in this Specification. Please note that TAIYO YUDEN shall not be liable for a failure and/or abnormality which is caused by use under the conditions other than the operating conditions hereof.
- d. The Product mentioned in this Specification is manufactured for use in Health & Fitness Equipment, Sensor and Toys. Before using this Product in any special equipment (such as medical equipment, space equipment, air craft, disaster prevention equipment), where higher safety and reliability are duly required, the applicability and suitability of this Product must be fully evaluated by the customer at its sole risk to ensure correct and safe operation of these special equipments. Also, evaluation of the safety function of this Product even for use in general electronics equipment shall be thoroughly made and when necessary, a protective circuit shall be added during the design stage, all at the customer's sole risk.
- e. a) You are requested to fully check and confirm by the start of mass production of this Product that (1) no bug, defect or other failure is included in firmware incorporated in this Product ("Incorporated Software"), (2) no bug defect or other failure arising from installation of this Product in which is contained Incorporated Software into your products is included in Incorporated Software, and that Incorporated Software fully meets your intended use, although TAIYO YUDEN sufficiently inspects or verifies quality of Incorporated Software.
b) Please note that TAIYO YUDEN is not responsible for any failure arising out of bugs or defects in Incorporated Software.
- f. TAIYO YUDEN warrants only that this Product is in conformity with this Specification for one year after purchase and shall in no event give any other warranty.
- g. Communication between this Product and others might not be established nor maintained depending on radio environment or operating conditions of this Product and other *Bluetooth*[®] products.
- h. In order to test for Radio Law certification with a device incorporating this module, the Host Software must be able to put the module into test mode. Please contact TAIYO YUDEN for further details.
- i. This Product operates in the unlicensed ISM band at 2.4GHz. In case this Product is used around the other wireless devices which operate in same frequency band of this Product, there is a possibility that interference may occur between this Product and such other devices. If such interference occurs, please stop the operation of other devices or relocate this Product before using this Product or do not use this Product around the other wireless devices.
- j. Please thoroughly evaluate our module with your products before going mass production.
- k. User Code Modification Notice.
User Code for sample modules or part numbers in this Specification are TAIYO YUDEN standard part numbers. When any modification is made to a module to meet requested specifications, the part number will be changed. Please contact TAIYO YUDEN to confirm whether your part number needs to be modified.
Please see the following examples for cases when part numbers are modified:
 - for specific firmware version (our standard item firmware will be upgraded occasionally)
 - for other relevant cases (specific or different setting, form, sizes, or display etc..)

Control No. HD-AG-A150123	(3/5)	Control name General Items
------------------------------	-------	-------------------------------

l. Alternative components may used to this module. The intended components is used within the warranty written in this document (characteristics, size, operating condition, reliability, public regulation such as radio type approval) and Taiyo Yuden confirmed there are not any problems with the replacement. The traceability of the components is secured each production lot.

m. Caution for Export Control

This Product may be subject to governmental approvals, consents, licenses, authorizations, declarations, filings, and registrations for export or re-export of the Product, required by Japanese Foreign Exchange and Foreign Trade Law (including related laws and regulations) and/or any other country's applicable laws or regulations related to export control.

If you plan to export or re-export this Product, it is strongly recommended that you check and confirm, the necessary procedures to export or re-export of this Product as required by applicable laws and regulations, and if necessary, you have to obtain necessary and appropriate approvals or licenses from governmental authority at your own risk and expense.

n. Japan Regulatory Information

This module is approved with the specific antenna on this module.

a) Please ensure that your product can bear a label with the following information. If the product is so small that it is not practicable to place the label, please place it in the instruction manual and package. The mark diameter shall be equal or grater than 3mm.

This product installs a radio system which has been approved as a radio station in a low power data communication system based on the Radio Law.

EYSGJN : 001-A05676

R 001-A05676

o. Canada Regulatory Information

a) This device complies with Industry Canada license-exempt RSS standards. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

b) This product is certified as type of the portable device with Industry Canada Rules. To maintain compliance with RF Exposure requirement, please use within specification of this product.

Ce produit est certifié comme type de l'appareil portable avec Industrie Règles de Canada. Pour maintenir l'acquiescement avec exigence Exposition de RF, veuillez utiliser dans spécification de ce produit.

- IC: 4389B-EYSGJN

-FVIN : F1

c) Please notify certified ID by either one of the following method on your product.

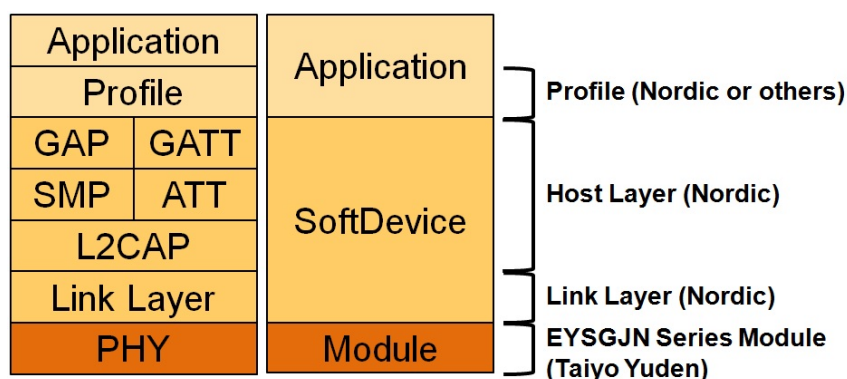

Spécifiez ID certifiée dans votre produit par une de méthode suivante.

-Contains Transmitter module IC : 4389B-EYSGJN

-Contains IC : 4389B-EYSGJN

Control No. HD-AG-A150123	(4/5)	Control name General Items
------------------------------	-------	-------------------------------

- p. FCC Regulatory Information
 - a) This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
 - b) Please notify certified ID by either one of the following method on your product.
 - Contains Transmitter Module FCC ID: RYYEYSGJN
 - Contains FCC ID: RYYEYSGJN
 - c) CAUTION: changes or modifications not expressly approved by the party responsible for compliance could void the use’s authority to operate the equipment.
 - d) This product is certified as type of the portable device with FCC Rules. To maintain compliance with RF Exposure requirement, please use within specification of this product.
 - e) The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- q. CE Regulatory Information
 - a) When your end product installs this module, it is required to proceed additional certification processes before placing on the market in EU member states to make your products fully comply with relative EU standards.
 - b) TAIYO YUDEN can provide you the test reports of conducted measurement portion for the radio module. You can utilize the test reports for the certification processes of your end product as it requires radio testing.
- r. This Product is designed for use in products which comply with *Bluetooth*[®] Specifications (Ver 4.2 LE) (“Bluetooth Specifications”). TAIYO YUDEN disclaims and is not responsible for any liability concerning infringement by this Product under any intellectual property right owned by third party in case the customer uses this Product in any product which does not comply with Bluetooth Specifications (the “non-complying products”). Furthermore, TAIYO YUDEN warrants only that this Product complies with this Specification and does not grant any other warranty including warranty for application of the non-complying products.
- s. EYSGJN series module is qualified as PHY only with Component category by Bluetooth SIG. The QDID of this module is 69825. The final product needs to get qualification as End product combining with PHY (module), SoftDevice and Profile before selling the product. The QDID of this product is Link Layer Master : 54056, Slave : 61110 and Host Layer Master : 66320, Slave : 56948. Please refer to following combination and consult with your qualification body and BQE.

Control No. HD-AG-A150123	(5/5)	Control name General Items
------------------------------	-------	-------------------------------

The use of Embedded Software
Before using this product.

Please kindly read carefully and understand the following before using the Products.

1. Taiyo Yuden Co., Ltd. (hereinafter "TY"), lawfully has copyrights and other rights to the software embedded to the memory of the Products (the "Embedded Software"). Except as otherwise expressly provided herein, your company is not permitted to disclose or offer the Embedded Software, either wholly or partly, to any third party (including uploading to your company or third party (ies)'s web sites and downloading by third parties from such sites), nor to copy, revise, reverse engineer, upgrade, make specification change, or alienate the Embedded Software.
2. Before using the Products, you need to check and confirm sufficient safety and operation of your products which incorporate the Products and interoperability and compatibility with other Bluetooth[®] enabled products.
3. TY have not evaluated and confirmed the interoperability, compatibility, etc. of the Products (including Embedded Software) with every kind of Bluetooth[®] enabled product. In addition, TY does not guarantee interoperability and compatibility of the Product with certain devices. In order to minimize the damage or harm arising out of the Potential Failure or out of combination with other devices, TY recommend your company set up interface or external pin (for detail, please refer to Specification " Pin Layout " of this document) for rewriting the Embedded Software.

Control No. HD-AM-A150123	(1/1)	Control name Absolute maximum ratings

VIO		-0.3	VCC_NRF+ 0.3	V
Storage temperature		-40	+85	Deg-C
MSL	Moisture Sensitivity Level	3		
ESD HBM	Human Body Model		1	kV
ESD MM	Machine Model		100	V
Endurance	Flash Memory Endurance	20000		write/erase cycles
Retention	Flash Memory Retention	10 years		At 40 deg-C
Number of times an address can be written between erase cycles			2	times

Control No. HD-AE-A150123	(1/2)	Control name Electrical characteristics
------------------------------	-------	--

Electrical characteristics**Recommendation operating range**

Symbol	Parameter	Min.	Typ.	Max.	Units
VCC_NRF	Supply voltage, normal mode	1.8	3.0	3.6	V
tR_VCC_NRF	Supply rise time (0V to 1.8V)*1			100	ms
TA	Operation temperature	-25	25	85	Deg-C

*1 The on-chip power-on reset circuitry may not function properly for rise times outside the specified interval. Also after power off, it must start up from below 0.3V. The on-chip power-on reset circuitry may not function properly.

DC Specifications

The Specification applies for Topr.= 25 degrees C, VCC_NRF = 3.0V

Symbol	Parameter (condition)	Min.	Typ.	Max.	Units
VIH	Input high voltage	0.7 VCC_NRF		VCC_NRF	V
VIL	Input low voltage	GND		0.3 VCC_NRF	V
VOH	Output high voltage (std. drive, 0.5 mA)	VCC_NRF-0.3		VCC_NRF	V
VOH	Output high voltage (high-drive, 5 mA)	VCC_NRF-0.3		VCC_NRF	V
VOL	Output low voltage (std. drive, 0.5 mA)	GND		0.3	V
VOL	Output low voltage (high-drive, 5 mA)	GND		0.3	V
RPU	Pull-up resistance	11	13	16	kohm
RPD	Pull-down resistance	11	13	16	kohm
ITX,+4dBm	TX only run current @ POUT =+4 dBm		16		mA
IRX	RX only run current		13		mA
IOFF	Current in SYSTEM-OFF, no RAM retention		0.6		uA
RSTR	RESET High to Module Ready		300	600	ms
RPW	RESET Pulse Width		5		ms

Note that when you use the RC oscillator, it will increase around 10uA of average power consumption compared to a 32.768kHz crystal.

UART specifications

Symbol	Description	Min.	Typ.	Max.	Units
f _{UART}	Baud rate for UART		38400		bps

Control No. HD-AE-A150123	(2/2)	Control name Electrical characteristics

Control No. HD-MC-A150123	(2/3)	Control name Circuit Schematic
------------------------------	-------	-----------------------------------

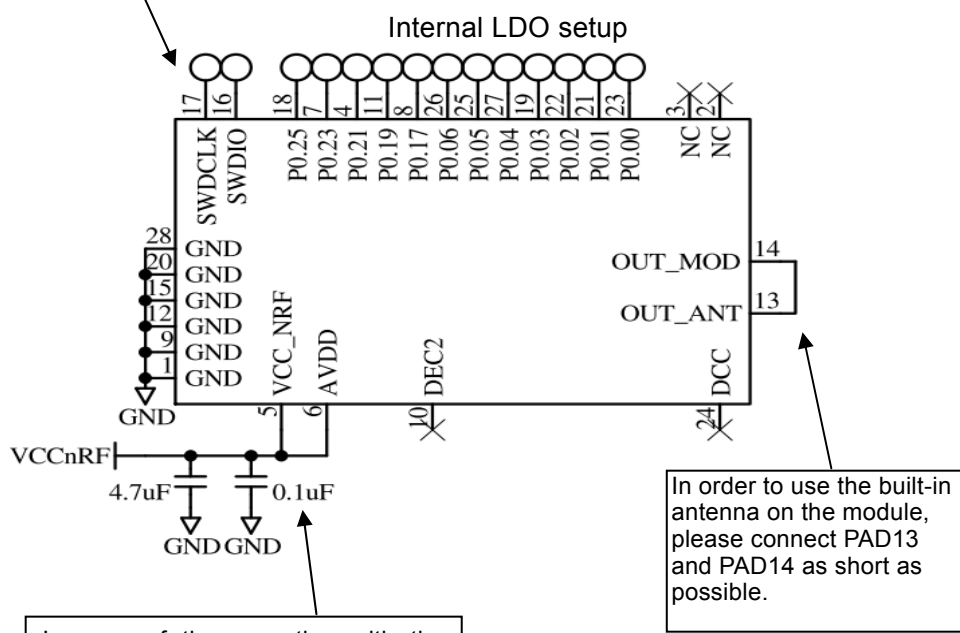

Sample circuits

Control No. HD-MC-A150123	(3/3)	Control name Circuit Schematic
------------------------------	-------	-----------------------------------

Reference Circuits

SWDIO is also system reset (active low).

In case of the operation with the battery, we recommend that you add a capacitor of about 100uF in view of the voltage drop during TX/RX.

In case of the power supply voltage fluctuation by the load change is large, the module may not function properly.

If an external regulator is used, the load change characteristic should be good in order to keep stable voltage as possible when the current is change.

Control No. HQ-BA-537	(1/2)	Control name Handling Precaution
--------------------------	-------	-------------------------------------

This specification describes desire and conditions especially for mounting.

Desire/Conditions

(1) Environment conditions for use and storage

1. Store the components in an environment of < **40deg-C/90%RH** if they are in a moisture barrier bag packed by TAIYO YUDEN.
2. Keep the factory ambient conditions at < **30deg-C/60%RH**.
3. Store the components in an environment of < **25±5deg-C/10%RH** after the bag is opened.
(The condition is also applied to a stay in the manufacture process).

(2) Conditions for handling of products

Make sure all of the moisture barrier bags have no holes, cracks or damages at receiving. If an abnormality is found on the bag, its moisture level must be checked in accordance with 2 in (2).

Refer to the label on the bag.

1. All of the surface mounting process (reflow process) must be completed **in 12 months** from the bag sea date.
2. Make sure humidity in the bag is less than **10%RH** immediately after open, using a humidity indicator card sealed with the components.
3. **All** of the surface mounting process (reflow process including rework process) must be completed in **168 hours** after the bag is opened (inclusive of any other processes).
4. If any conditions in (1) or condition 2 and 3 in (2) are not met, bake the components in accordance with the conditions at **125deg-C 24hours**
5. As a rule, baking the components in accordance with conditions 4 in (2) shall be once.
6. Since semi-conductors are inside of the components, they must be free from static electricity while handled.(<100V) Use ESD protective floor mats, wrist straps, ESD protective footwear, air ionizers etc. , if necessary.
7. Please make sure that there are lessen mechanical vibration and shock for this module, and do not drop it.
8. Please recognize pads of back side at surface mount.
9. Washing the module is not recommended. If washing cannot be avoided, please test module functionality and performance after thoroughly drying the module.
We cannot be held responsible for any failure due washing the module.
10. Please perform temperature conditions of module at reflow within the limits of the following.
Please give the number of times of reflow as a maximum of 2 times.

Control No. (1/3)	Control name Antenna application note
----------------------	--

Recommended module mounting example

*1 Please do not place any metal components in blue shaded space,(*1) such as signal line and metal chassis as possible except for main board while mounting the components in *1 space on the main board is allowed except for no copper plating area. (*2).

*2 This area is routing prohibited area on the main board. Please do not place copper on any layer. Please remain use of FR-4 dielectric material. The antenna is tuned with the FR-4.

*3 Characteristics may deteriorate when GND pattern length is less than 30mm. It should be 30 mm or more as possible.

Even when above mentioned condition is satisfied, communication performance may be significantly deteriorated depending on the structure of the product.

Control No.	Control name
(2/3)	Antenna application note

Other module mounting examples

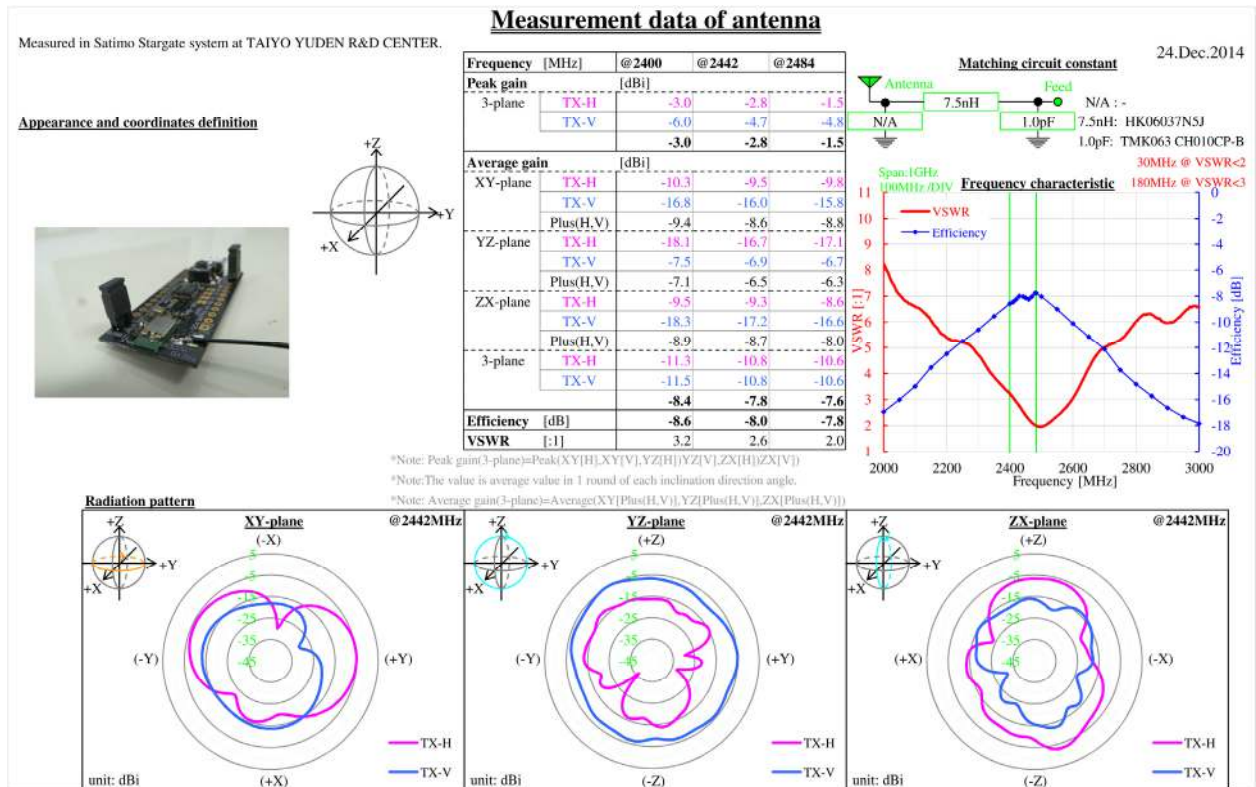

Placement of resin or plastic parts

Please do not apply molding over the antenna area of BLE module.

Control No. (3/3)	Control name Antenna application note
--------------------------	--

Directional characteristics example (when mounted on evaluation board)

About this Application Note

- This Application Note has been prepared as a reference material to help obtaining the antenna performance mounted on BLE module better while it is not guaranteed or assured to obtain better communication performance and distance.
- This product “BLE module” has been certified and matching circuit constant for antenna within module cannot be changed when ambient environment condition changes. The product must be re-certified when matching circuit constant is changed.

Control No. (1/1)	Control name Design guide
----------------------	------------------------------

1. Power Up Sequence

VCC_NRF power supply rise time (0V to 1.8V) must not exceed 100ms.

2. Recommended Power Circuit

VCC_NRF is the main power supply (1.8 – 3.6V) for this module. The supply voltage range of VCC_NRF is 1.8V to 3.6V in LDO mode and 2.1V to 3.6V in DCDC mode. For more information of internal DC/DC converter operation, please refer to chapter 12.1.3 of "nRF51_Series_Reference_Manual v3.0" by Nordic Semiconductor. In case of the power supply voltage fluctuation by the load change is large, the module may not function properly. If an external regulator is used, the load change characteristic should be good in order to keep stable voltage as possible when the current is change.

3. Battery operation

When using a small battery (e.g. CR2032), a large capacitor (e.g.100uF low leakage capacitor) should be placed near the battery. This will reduce the voltage drop especially when the module is operated at low temperatures

4. Pattern Design Guide

4-1. Power Supply System

Power supply bypass capacitors should be placed close to the VCC_NRF pin of the module. The VCC_NRF trace should be greater than 0.5mm and a bigger a via diameter is recommended.

4-2. Bypass Capacitor Layout

A parallel combination of a small capacitance (about 10pF) and a large capacitance (1uF to 10uF) is recommended for bypass capacitors. The GND of the bypass capacitor should be placed close to an adjacent module GND to ensure the shortest closed loop.

4-3. GND Pattern

Power supply bypass capacitor GND should be placed in proximity of module GND. Wide GND area must be provided to ensure isolation for each layer.

GND pattern of each layer should be connected to GND area with large number of via.

Module can only accept control commands in this mode.
- **Connect mode:**
In this mode, module will transparently send and receive data. When disconnected, it will return to Command Mode.
- **Direct Test mode**
RF PHY testing of *Bluetooth*® low energy devices.

3. Control Command Syntax

Control commands which the host sends are based on character strings that start with “B”(ASCII code: 0x42, 66 decimal), and that end with <CR><LF> (ASCII code: 0x0D 0x0A) (decimal values 13, 10).

Response event which host receives are started with <CR><LF> and ended <CR><LF>. Please note that this specification / application does not allow for multiple commands to be sent to the host. The application is not responsible for parsing of packets / command sequences.

Command Mode – Control Command:

“B”{*command characters*}[*Parameter1Parameter2:: Parameter(N)*]<CR><LF>

Response Event:

<CR><LF>{*event characters*}[*Parameter1Parameter2::Parameter(N)*]<CR><LF>

4. Peripheral

4.1 Command and Event List

4.1.1. Common Commands

Command Character	Function	Parameter	Response
Configuration These commands are available when advertising stopped.			
ST3	Set Local Device Name (MAX 16CHARACTERS)	<u>Parameter:</u> Device_name	Successful: ACK Failed: NAK##
ST5	Set PSKEY Value (Note Values 0 >= are valid) Example BST5030100 (set PSKEY 03 to 0x0100) Please refer section 0.	<u>Parameter 0:</u> PSKEY: DD (Decimal) <u>Parameter 1:</u> Value: HHHH (Hex Word)	Successful: ACK Failed: NAK##
GT3	Read Local Device Name		Successful: Local Device Name, ACK Failed: NAK##
GT5	Read PSKEY Value Example: BGT501 (Get PSKEY 1)		Successful: KVHHHH, ACK Failed: NAK##
DD	Delete Paired Initiator's BD Address Reset is necessary to enable deletion.		Success: ACK Failed: NAK##
RS	Reset the module		Successful: Ver. XXXX Failed: NAK##
RL	Role switch	<u>Parameter:</u> 0 : Peripheral 1 : Central	Successful: ACK Failed: NAK##

Link Control			
CD	Connectable & Discoverable (Advertising Start or Stop)	<u>Parameter</u> Connectable / Discoverable flag '0' – Advertising Stop. Not Connectable or Discoverable. '1' – Advertising Start. Connectable and Discoverable. Allow Scan Request from Any, Allow Connect Request from White List Only. '2' – Directed Advertising Start. '3' – Both Advertising Start. Connectable and Discoverable. '4' – Discoverable but not connectable.	Successful: ACK, Failed: NAK##

4.1.2. Common Response Events

Response Events	Function	Parameters
ACK	Successful	
NAK##	Failed	Failed Reason – See Error section 4.3. for further details.
CON	Connection successful	Established Remote BD_ADDR
DCO	Disconnect	
ADT	Advertising Timeout	
PAS	Pairing Success	
SDC	Service Discovery Complete	
DSR	Disable Service	

4.2 Persistent Store (PS) User Key Description List

All Values for "Defaults" are in HEX notation.

Name	PSKEY_USER00	Key Length:	1
Descriptive Name:	Baud rate		
Description:	Set Session Baud Rate. (bps) 0001: 9600, 0002: 19200, 0003: 38400, 0004: 57600, 0005: 115200 0006: 230400, 0007: 460800, 0008: 921600		
Default:	0001 (9600bps)		
Range	0001 - 0008		

Name	PSKEY_USER01	Key Length:	1
Descriptive Name:	Advertising Timeout (sec)		
Description:	Advertising Timeout defines the timeout for the advertising. 0000 means timeout is disabling. Advertising will continue forever.		
Default:	003C (60sec)		
Range	0000 – 00B4 (0 – 180sec)		

Name	PSKEY_USER02	Key Length:	1
Descriptive Name:	Advertising Interval (msec)		
Description:	The time between the start of two consecutive advertising events. The value in this parameter is multiplied by 0.625msec.		
Default:	0040 (40msec)		
Range	0020 – 4000 (20 – 10240msec)		

Name	PSKEY_USER03	Key Length:	1
Descriptive Name:	Connection Interval Minimum (msec)		
Description:	Defines minimum value for the connection interval. The value in this parameter is multiplied by 1.25msec.		
Default:	0050 (100msec)		
Range	0006 – 0C80 (7.5 – 4000msec)		

Name	PSKEY_USER04	Key Length:	1
Descriptive Name:	Connection Interval Maximum (msec)		
Description:	Defines maximum value for the connection interval. The value in this parameter is multiplied by 1.25msec.		
Default:	00A0 (200msec)		
Range	0006 – 0C80 (7.5 – 4000msec)		

Name	PSKEY_USER05	Key Length:	1
Descriptive Name:	Slave latency		
Description:	Defines the slave latency for the connection in number of connection events. The Slave Latency field shall have a value in the range of 0 to ((SupervisionTimeout / connectionInterval) -1). The Slave Latency field shall be less than or equal to 500.		
Default:	0000		
Range	0000 – 01F4 (0 – 500)		

Name	PSKEY_USER06	Key Length:	1
Descriptive Name:	Supervision Timeout (msec)		
Description:	Defines the connection supervision timeout. The value in this parameter is multiplied by 10msec.		
Default:	01F4 (5000msec)		
Range	000A– 0C80 (100 – 32000msec)		

Name	PSKEY_USER07	Key Length:	1
Descriptive Name:	Auto Advertising Start setting		
Description:	This will store Auto Advertising Start setting. “0000” will enable Auto Advertising Start. Advertising will start automatically when startup or disconnected. “0001” will disable Auto Advertising Start.		
Default:	0000		
Range	0000– 0001		

Name	PSKEY_USER08	Key Length:	1
Descriptive Name:	Security setting		
Description:	This will store Security setting. "0000" will disable Security setting. "0001" will enable Security setting (LE Security Mode1, Level 2).		
Default:	0000		
Range	0000– 0001		

Name	PSKEY_USER12	Key Length:	1
Descriptive Name:	TX power setting.		
Description:	Set the radio's transmit power. Radio transmit power in dBm (accepted values are -30, -20, -16, -12, -8, -4, 0, and 4 dBm). 0000: 4, 0001: 0, 0002: -4, 0003: -8, 0004: -12, 0005: -16, 0006: -20, 0007: -30		
Default:	0000		
Range	0000– 0007		

Name	PSKEY_USER13	Key Length:	1
Descriptive Name:	DC/DC converter setting		
Description:	DC/DC converter setting. "0000" will disable internal DC/DC converter (and use internal LDO). "0001" will enable internal DC/DC converter. Note: When supply voltage goes below 2.1V, DCDC is disabled, and enabled when the supply voltage goes up again. About hardware specification, please refer to "DataReport".		
Default:	0000		
Range	0000– 0001		

Name	PSKEY_USER14	Key Length:	1
Descriptive Name:	RSSI notification setting		
Description:	RSSI notification setting. Parameter "XYZZ" X : RSSI of Advertising Event (1 : enable 0: disable) * ignored in Peripheral Y : RSSI of Connection Event (1 : enable 0: disable) ZZ : Skip count ((0x)00 – (0x)FE) 2-digit hexadecimal number of Connection Event in which RSSI is not notified.		
Default:	0000		
Range	0000– 11FE		

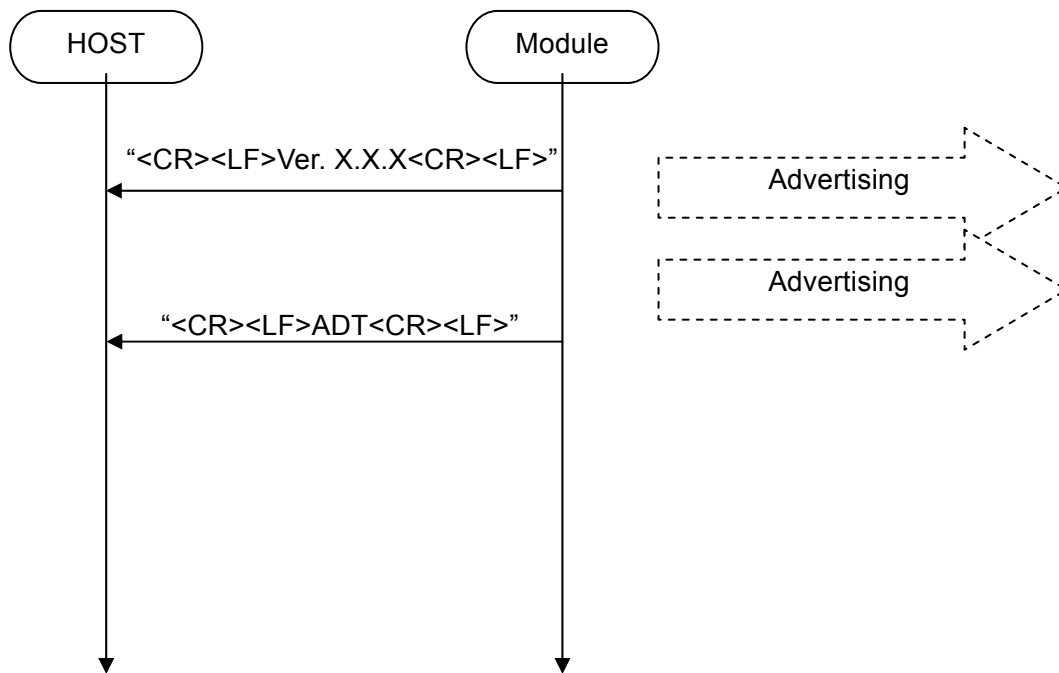

Device Name: "TYSA-B 3.0.0"

4.3 Error Codes

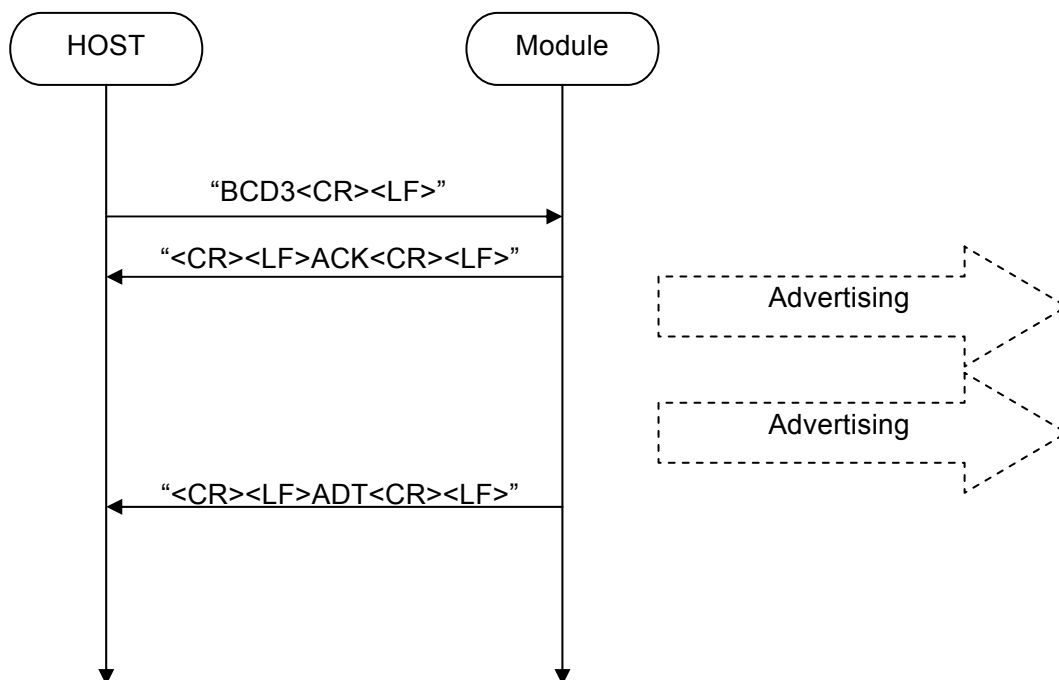

Omitted.

4.4 Message Sequence Chart

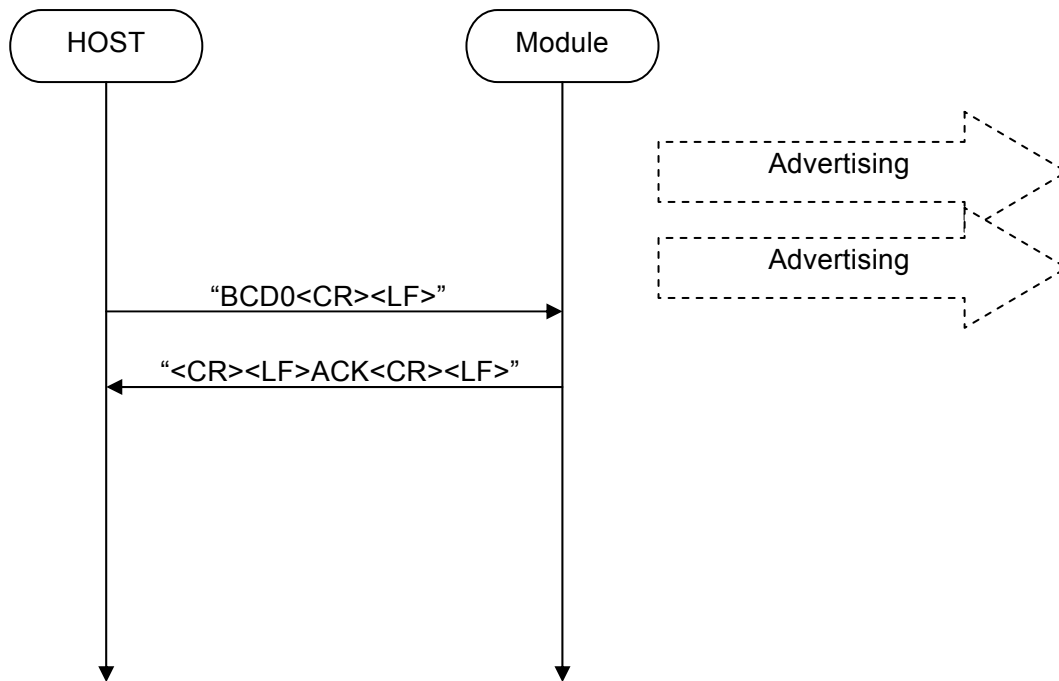

4.4.1. Power On (In case of PSKEY_USER01≠'0000' and PSKEY_USER07='0000')

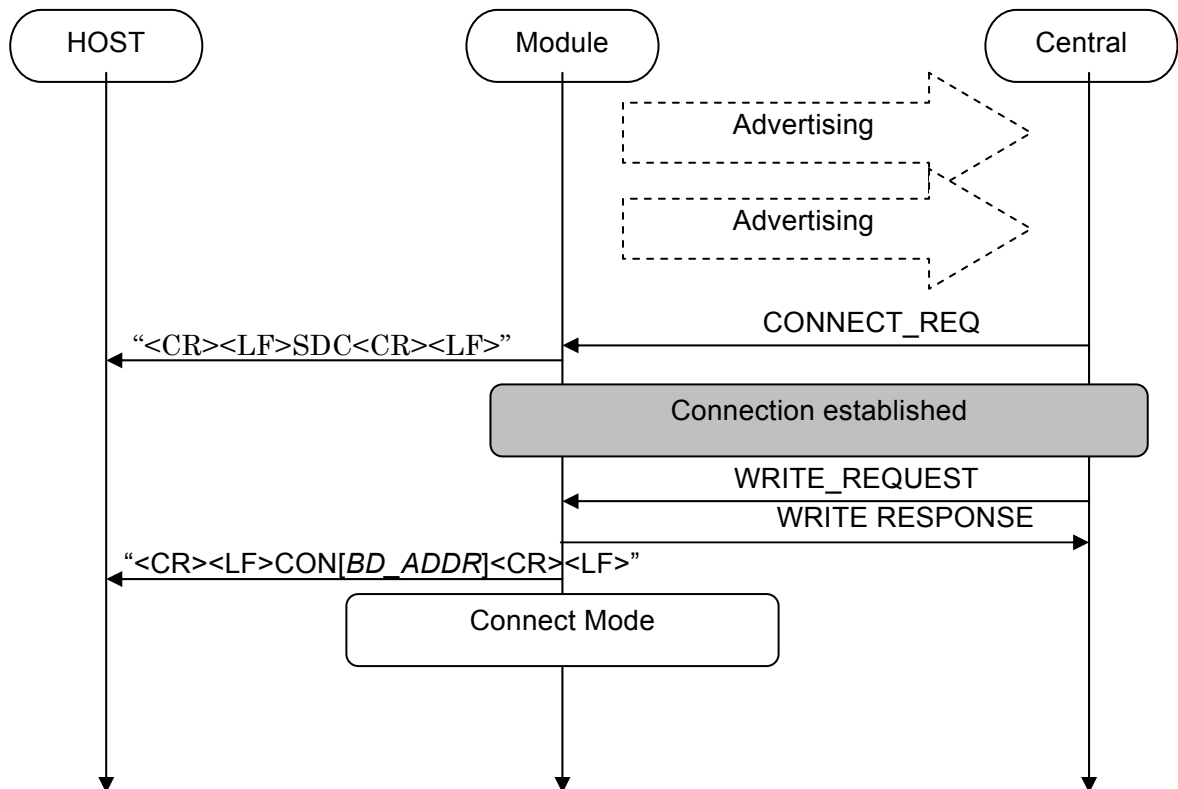

4.4.2. Advertising Start

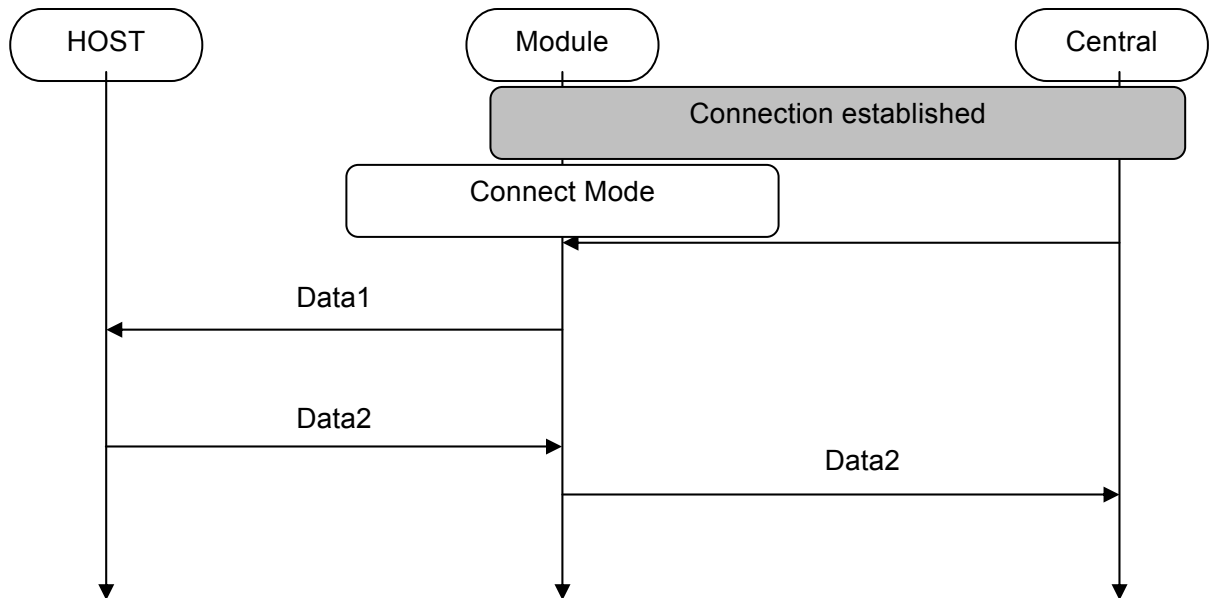

4.4.3. Advertising Stop

4.4.4. Connect

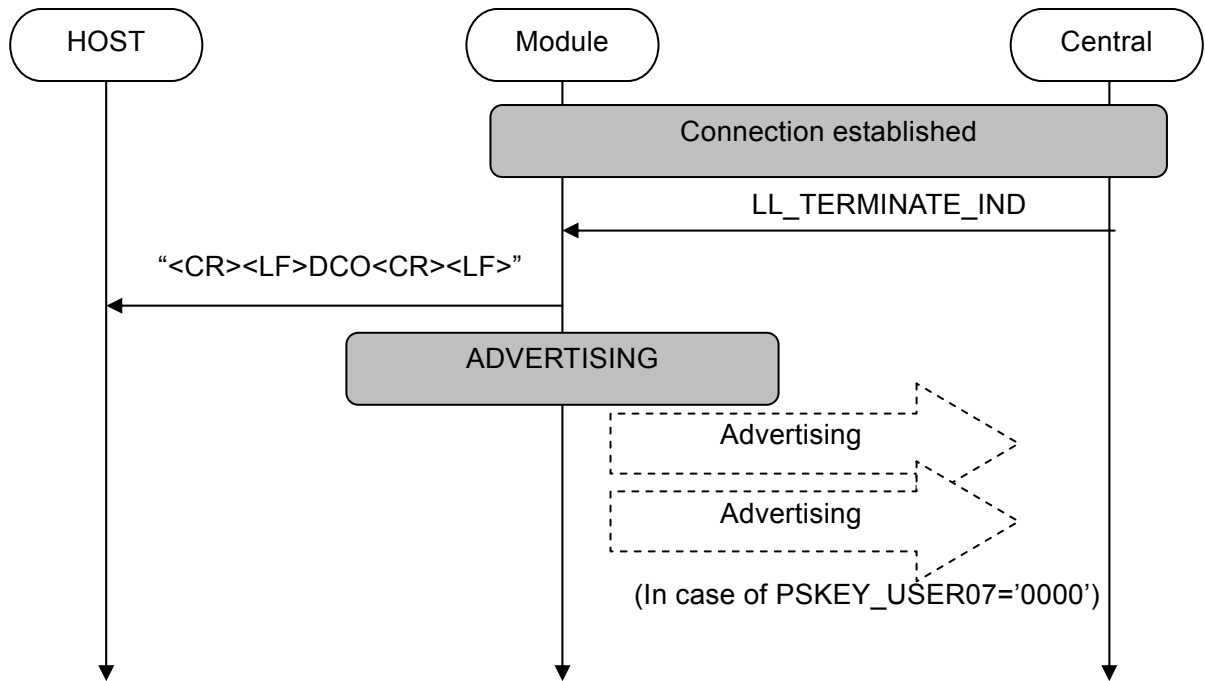

4.4.5. Sending & Receiving Data over a connected Link

Max send a packet data size = 20bytes

Max receive a packet data size = 20bytes

4.4.6. Disconnect

4.5 GPIO state and control

Pin Name	Input / Output	Description
P0.04	Input	Forced initialize, Request Sleep mode
P0.06	Input	Disconnect request
		Resume from Power saving mode

その他、注意事項について (Precautions)

- 弊社製品のご使用に際しては、使用する機器に実装された状態および実際の使用環境での評価および確認を必ず行ってください。
- 当仕様書に記載の製品は、一般的な電子機器【AV 機器、OA 機器、家電製品、事務機器、情報・通信機器（携帯電話、パソコンなど）】で使用されることを意図されています。従いまして、生命または身体に直接危害を及ぼす可能性のある機器【輸送用機器（自動車駆動制御装置、列車制御装置、船舶制御装置など）、交通用信号機器、防災機器、医療用機器、公共性の高い情報通信機器（電話交換機、電話・無線・放送などの基地局）】などへのご使用をご検討の場合は、必ず事前に弊社までお問い合わせをお願いします。
また、高度の安全性や信頼性が求められる機器【宇宙用機器、航空用機器、原子力用制御機器、海底用機器、軍用機器など】につきましては、弊社製品をご使用されないようお願いいたします。
なお、一般的な電子機器においても安全性や信頼性の要求が高い機器、回路などに弊社製品をご使用になる場合には、十分な安全性評価を実施され、必要に応じて設計時に保護回路などを追加していただくことをお勧めします。
弊社の書面による事前の承諾を得ることなく、前述の弊社への問い合わせが必要な機器または弊社が使用を禁止する機器に当仕様書に記載の製品を使用したことによりお客様または第三者に生じた損害に関して、弊社は一切の責任を負いかねますのでご了承ください。
- 弊社製品を使用したことにより、第三者の知的財産権などの権利に関わる問題が発生した場合、弊社はその責任を負いかねます。また、これらの権利の実施権許諾を行うものではありませんのでご了承ください。
- 弊社製品の保証範囲につきましては、別途書面による契約がない限り、納入された弊社製品単体の保証に限られ、弊社製品の故障や取壊から誘発される損害に関して、弊社は一切の責任を負いかねますのでご了承ください。
- 当仕様書の記載内容につきましては、弊社の営業所・販売了会社・販売代理店（いわゆる「正規販売チャンネル」）からご購入いただいた弊社製品に適用します。上記以外からご購入いただいた弊社製品に関しては適用対象外とさせていただきますのでご了承ください。
- 輸出注意事項
当仕様書に記載の製品の一部には、輸出の際に「外国為替及び外国貿易法」並びに米国の輸出管理関連法規などの規制をご確認の上、必要な手続きをお取りいただく必要のある製品があります。ご不明な場合には弊社までお問い合わせください。
- Please conduct validation and verification of our products in actual condition of mounting and operating environment before using our products.
- The products listed in this specification are intended for use in general electronic equipment (e.g., AV equipment, OA equipment, home electric appliances, office equipment, information and communication equipment including, without limitation, mobile phone, and PC). Please be sure to contact TAIYO YUDEN for further information before using the products for any equipment which may directly cause loss of human life or bodily injury (e.g., transportation equipment including, without limitation, automotive powertrain control system, train control system, and ship control system, traffic signal equipment, disaster prevention equipment, medical equipment, highly public information network equipment including, without limitation, telephone exchange, and base station).
Please do not incorporate our products into any equipment requiring high levels of safety and/or reliability (e.g., aerospace equipment, aviation equipment, nuclear control equipment, undersea equipment, military equipment).
When our products are used even for high safety and/or reliability-required devices or circuits of general electronic equipment, it is strongly recommended to perform a thorough safety evaluation prior to use of our products and to install a protection circuit as necessary.
Please note that unless you obtain prior written consent of TAIYO YUDEN, TAIYO YUDEN shall not be in any way responsible for any damages incurred by you or third parties arising from use of the products listed in this specification for any equipment requiring inquiry to TAIYO YUDEN or prohibited for use by TAIYO YUDEN as described above.
- Please note that TAIYO YUDEN shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from use of our products. TAIYO YUDEN grants no license for such rights.
- Please note that unless otherwise agreed in writing, the scope of warranty for our products is limited to the delivered our products themselves and TAIYO YUDEN shall not be in any way responsible for any damages resulting from a fault or defect in our products.
- The contents of this specification are applicable to our products which are purchased from our sales offices or authorized distributors (hereinafter "TAIYO YUDEN's official sales channel"). Please note that the contents of this specification are not applicable to our products purchased from any seller other than TAIYO YUDEN's official sales channel.
- Caution for Export
Some of our products listed in this specification may require specific procedures for export according to "U.S. Export Administration Regulations", "Foreign Exchange and Foreign Trade Control Law" of Japan, and other applicable regulations. Should you have any questions on this matter, please contact our sales staff.
