## *TFT* LCD 2

|                   |   |
|-------------------|---|
| LCD Modules ..... | 2 |
|-------------------|---|

## *Imaging* CMOS IMAGE SENSORS / CCDs 7

|  |    |
|--|----|
| CMOS Image Sensors for Digital Cameras / |    |
| Digital Camcorders .....                 | 7  |
| Progressive CCDs .....                   | 8  |
| 1/3-type CCDs .....                      | 10 |
| 1/4-type CCDs .....                      | 10 |
| DSPs for CCDs .....                      | 11 |
| CCD Peripheral ICs/LSIs .....            | 12 |

## *LSI* SYSTEM LSIs 13

|                                     |    |
|-------------------------------------|----|
| Touch Panel Controller .....        | 13 |
| System LSIs .....                   | 14 |
| Touch Panel Controller Module ..... | 14 |

## *Analog* ANALOG ICs 15

|  |    |
|--|----|
| LED Drivers .....                                | 15 |
| AC-DC Conversion Type ICs for LED Lighting ..... | 16 |

## *LSI Imaging* PACKAGES 17

|                              |    |
|------------------------------|----|
| CSP (Chip Size Package)..... | 17 |
| SiP (System in Package)..... | 18 |
| Package Lineup.....          | 20 |

## *OPTO* OPTOELECTRONICS / IR DEVICES 21

|  |    |
|--|----|
| Photocoupler Lineup.....                                   | 21 |
| Photocouplers.....   | 22 |
| Phototransistor Output Type.....                           | 22 |
| OPIC Output .....  | 25 |
| Phototriac Coupler Lineup .....                            | 27 |
| Phototriac Couplers .....                                  | 28 |
| Solid State Relay Lineup .....                             | 30 |
| Solid State Relays .....                                   | 31 |
| DIP type .....   | 31 |
| Photointerrupter Lineup .....                              | 32 |
| Photointerrupters <Transmissive type> .....                | 33 |
| Single Phototransistor Output.....                         | 33 |
| OPIC Type .....  | 35 |
| Photointerrupters <Reflective type> .....                  | 36 |
| Single Phototransistor Output.....                         | 36 |
| OPIC Output .....  | 37 |
| Proximity Sensor.....                                      | 38 |
| Proximity Sensor with Integrated Ambient Light Sensor..... | 38 |
| Proximity/Gesture Sensor with                              |    |
| Integrated Ambient Light Sensor .....                      | 39 |
| UV Light Sensors.....                                      | 39 |
| OPIC Light Detectors.....                                  | 40 |
| Phototransistor Lineup.....                                | 41 |
| Phototransistors.....                                      | 41 |
| PIN Photodiodes.....                                       | 42 |
| Infrared Emitting Diode Lineup .....                       | 43 |
| Infrared Emitting Diodes .....                             | 43 |
| Optical-Electric Sensor Lineup .....                       | 44 |
| Distance Measuring Sensors.....                            | 45 |
| Dust Sensor Unit.....                                      | 47 |
| IR Detecting Unit for Remote Control Lineup                |    |
| (Classified by Form).....                                  | 48 |
| IR Detecting Units for Remote Control .....                | 49 |

All products listed on this page are LED backlight models.

\*1 Protrusions such as positioning bosses are not included.

(Note) Please note that the specifications are subject to change without prior notice for product improvement.

**Notice**

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.

Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP. \*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

|                |              | RJ31P3AD0DT*2                  | 2.8M 30 fps<br>(2 ch output)                | Primary color       |                         |                          | 750                        |                          |                |
|                |              |                                |   | B/W                 |                         |                          | 1 150                      |                          |                |

\*1 The average G signal output voltage (the average output voltage in the case of the complementary color filter) when a 1,000-lux light source with a 90% reflector is imaged by a lens of F4 at 1/30 sec (1/25 sec in the case of RJ3341AA0PB) frame accumulation.

\*2 This model is the next-generation model. Light efficiency including the near-infrared light region has been drastically improved by our process technology.

**Notice**

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.  
 Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.  
 \*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.  
 Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

\*1 The average G signal output voltage when a 1,000-lux light source with a 90% reflector is imaged by a lens of F4 at 1/30 sec frame accumulation.

\*2 This model is the next-generation model. Light efficiency including the near-infrared light region has been drastically improved by our process technology.

**Notice**

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.

Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.

\*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

■ Touch Panel Controller

● Features

1. By adopting Sharp's proprietary method, approximately eight times more sensitivity (comparison by Sharp) has been achieved compared with the conventional sequential driving method.\*

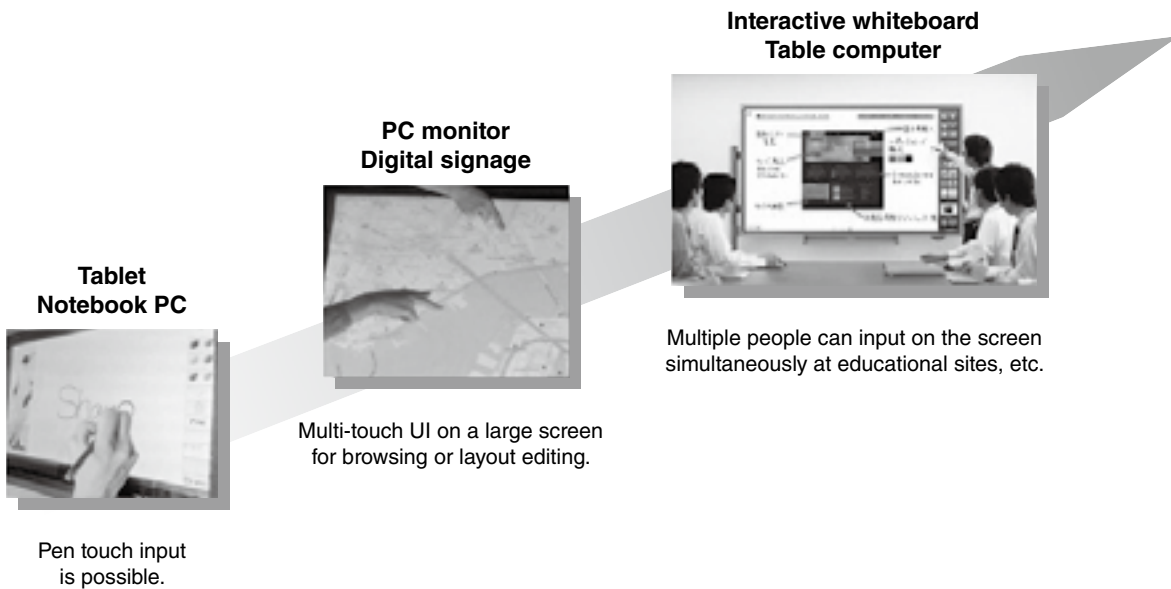

Capable of sensing a  $\phi 2$  mm pen touch, multi-touch operation and touch operation using a glove.

2. Contributes to a thinner design of a touch panel display.

A thinner design is achievable because the design is insusceptible to the noise effect, which makes space for the sensor sheets and the display modules unnecessary.

\* When comparing an S/N ratio of 3.58 determined through the conventional sequential driving method using pen-touch writing on a 20-inch screen with an S/N ratio of 30.65 determined through Sharp's proprietary parallel driving method (measured by Sharp).

● Application Examples

System LSIs

**Notice**

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.  
 Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.  
 \*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.  
 Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

## ■ System LSIs

| Model No. | Function  | Features   | Supply voltage (V)  | Package          |
|-----------|---|--|---|------------------|
| LR388K4   | Touch panel controller for tablets (7 to 10 inches) | <ul style="list-style-type: none"> <li>• 10-finger multi-touch detection</li> <li>• Scanning speed: 240 Hz</li> <li>• Capable of sensing a <math>\phi 2</math> mm pen touch</li> <li>• USB/I<sup>2</sup>C/SPI interface</li> <li>• Built-in palm cancellation feature</li> </ul> | Core: 1.2 $\pm$ 0.12<br>I/O: 3.3 $\pm$ 0.3<br>Analog: 3.3 $\pm$ 0.3 | P-VFBGA360P-0613 |

## ■ Touch Panel Controller Module

| Model No. | Function  | Features   | Supply voltage (V) | Outline dimensions (W x D) (mm) |
|-----------|---|--|--------------------|---------------------------------|
| LR0G964   | Touch panel controller module for medium-size screens (10 to 15.6 inches) | <ul style="list-style-type: none"> <li>• 10-finger multi-touch detection</li> <li>• Scanning speed: 240 Hz</li> <li>• Capable of sensing a <math>\phi 2</math> mm pen touch</li> <li>• Built-in palm cancellation feature</li> <li>• USB interface</li> <li>• Built-in power supply circuit</li> </ul>                                       | 5                  | 74 x 46                         |
| ☆LR0G970  | Touch panel controller module for medium-size screens (15.6 to 27 inches) | <ul style="list-style-type: none"> <li>• 10-finger multi-touch detection</li> <li>• Scanning speed: 240 Hz</li> <li>• Capable of sensing a <math>\phi 2</math> mm pen touch</li> <li>• Built-in palm cancellation feature</li> <li>• USB interface</li> <li>• Built-in power supply circuit</li> <li>• Compatible with active pen</li> </ul> | 5                  | 50 x 90                         |
| LR0G967   | Touch panel controller module for medium-size screens (15 to 32 inches)   | <ul style="list-style-type: none"> <li>• 10-finger multi-touch detection</li> <li>• Scanning speed: 240 Hz</li> <li>• Capable of sensing a <math>\phi 2</math> mm pen touch</li> <li>• Built-in palm cancellation feature</li> <li>• USB interface</li> <li>• Built-in power supply circuit</li> </ul>                                       | 5                  | 60 x 80                         |
| ☆LR0G971  | Touch panel controller module for large-size screens (Over 42 inches)     | <ul style="list-style-type: none"> <li>• 50-finger multi-touch detection</li> <li>• Scanning speed: 120 Hz</li> <li>• Capable of sensing a <math>\phi 2</math> mm pen touch</li> <li>• Built-in palm cancellation feature</li> <li>• USB interface</li> <li>• Built-in power supply circuit</li> </ul>                                       | 5                  | 100 x 220                       |

■ CSP

● CSP (Chip Size Package)

The FBGA (commonly known as CSP) has an area array terminal structure with solder balls on the bottom, to give it a near chip-size footprint. This high-density, compact and low-profile package technology will greatly help in the design of compact mobile equipment, such as mobile phones and digital cameras.

FBGA (CSP)

● Wafer-level CSP

The wafer-level CSP (WL-CSP) is a kind of chip-size package which is manufactured by assembling directly onto the finished wafer.

|   |   |             |             |                 |                 |             |             |  |           |        |        |        |        |        |        |                         |            |            |            |            |            |            |

## ■ SiP (System in Package)

System in Package is SHARP's original high-density mounting technology that achieves high-density memory capacity and multiple functions by stacking multiple ICs or multiple packages. The System in Package technology means chip-stacked package technology that can achieve up to 5-chip mounting by stacking ICs in a single package. The System in Package technology contributes to higher functionality of applications, such as mobile phones and digital cameras, as well as to reduction in size and weight.

### ● Chip Stacked CSP

|                                     |  |
|-------------------------------------|--|
| <p><b>Features</b></p>              | <ul style="list-style-type: none"> <li>● <b>Wide variety of lineup</b><br/>It is possible to provide a wide lineup of stacked CSPs, including 2-chip, 3-chip, 4-chip and 5-chip stacked CSPs, to respond to customer needs.</li> <li>● <b>Compact and thinner size</b><br/>Encapsulating multiple ICs into an existing plastic package contributes to decreasing the mounting area. In addition, SHARP's wafer thinning technology makes it possible to achieve 1.4 mm (MAX.) package height.</li> <li>● <b>Multiple functions</b><br/>Multiple ICs of different sizes and functions, such as logic LSIs and memories, can be incorporated in a single package, making possible multiple functions.</li> <li>● <b>Same-size IC stacking technology</b><br/>SHARP's stacking technology enables stacking of multiple same-size ICs, contributing to higher memory density.</li> </ul> <p><b>(4-chip stacked CSP)</b><br/>When using a SHARP four-chip stacked CSP, the mounting area and weight of a package can be decreased by half in comparison with using two 2-chip stacked CSPs, or a 3-chip stacked CSP and a conventional CSP.</p> |
| <p><b>Cross section example</b></p> | <p>(5-chip stacked CSP)</p> <p style="text-align: right;">* At 0.8 mm terminal pitch</p>   |

**Notice**

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.  
 Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.  
 \*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.  
 Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

●Chip Stacked TSOP/QFP\*/VQFN/HQFN

|                                     |  |
|-------------------------------------|--|
| <p><b>Features</b></p>              | <ul style="list-style-type: none"> <li>● <b>Decreased mounting area</b><br/>By encapsulating two identical or different types of ICs into a single conventional plastic package, the mounting area of the package can be decreased.</li> <li>● <b>Multiple functions</b><br/>Thanks to the incorporation of different sizes and functions of multiple ICs, such as logic LSIs and memories, the functionality increases.</li> <li>● <b>Higher memory density</b><br/>When incorporating two identical memory ICs into a single package, memory density doubles on the same mounting area.</li> </ul> |
| <p><b>Cross section example</b></p> | <p>(TSOP, QFP*)<br/>(Hamburger type)</p> <p>(Turtle stack type)</p> <p>(VQFN)</p> <p>(HQFN)</p> <p>Package height 1.0 mm (MAX.)</p>  |

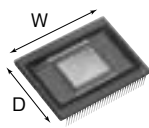

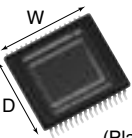

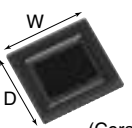

\* Including TQFP and LQFP.

Note: A voltage regulator circuit is built-in but may be affected by the usage environment. Install with an externally mounted C and R as a power supply filter.

\*1 When no signal is input (during input light).

\*2 Figures in parentheses indicate the distance to the light detection center.

\*3 fo = 32.75/36/36.7/38/40 kHz

### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.  
Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.  
\*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc.

Except where specially indicated, models listed on this page comply with the RoHS Directive\*. For details, please contact SHARP.

\*RoHS Directive: Prohibits use of lead, cadmium, hexavalent chromium, mercury and specific brominated flame retardants (PBBs and PBDEs), with certain exceptions.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

## ■ Europe: LNBs for Satellite Broadcast

### ◆ Features

- (1) Wide band type receiving all broadcasting channels (analog & digital) in Europe. [Universal LNB]
- (2) Originally developed feed-horn waveguide makes the wide-band, low-noise characteristics possible.
- (3) One of the industry's most compact and lightweight package.
- (4) Low dissipation current design for energy saving. [95 mA (TYP.): BS1K2EL100A]

### ◆ Specifications

## ■ Digital DBS Front-End Units

### ◆ Features

- (1) Equipped with a high-performance direct conversion IC. Reliability is improved by reducing power consumption and component counts.
- (2) Wide-band reception design also covering CS broadcast band. [Input frequency: 950 to 2 150 MHz]
- (3) User support tools can be provided. [Sample/evaluation boards and software are available.]

### ◆ Standard Specifications <IQ output type>

| Destination                         | Global (ISDB-S/DVB-S2/ABS-S)   |                               |
|-------------------------------------|--------------------------------|-------------------------------|
| Input type                          | 1-input/1-loop through output  | 1-input                       |
| Model No.                           | BS2S7VZ7D03                    | BS2S7VZ6D02                   |
| Input frequency (MHz)               | 950 to 2 150                   |                               |
| Input signal level (dBm)            | -65 to -25                     |                               |

## ■ Front-End Units for DVB-T2/DTMB

### ◆ Features

- (1) Low phase noise characteristics, high elimination of adjacent channel interference.
- (2) Compact, low power consumption.
- (3) Other types are available with various chassis forms (vertical or horizontal type) and input connectors (F or DIN type), etc.

### ◆ Standard Specifications

| Destination             | Europe/Asia (DVB-T2), China (DTMB) |                   |                                |
|-------------------------|------------------------------------|-------------------|--------------------------------|
| Model No.               | VA4M1DX2331                        | VA4M1DX2323       | VA4M2DX2194                    |
| Input frequency (MHz)   | 51 to 868                          |                   | 47 to 868                      |
| Output type             | DIF                                | DIF (Off through) | DIF (Dual output)              |
| Noise figure (dB)       | 5 (TYP.)                           |                   |                                |
| Phase noise (dBc/Hz)    | -90                                |                   |                                |
| Supply voltage (V DC)   | 3.3, 1.8                           |                   | 5, 3.3, 1.8                    |
| Power consumption (W)   | 0.49                               |                   | 1.13                           |
| Outline dimensions (mm) | 24.2 (W) × 25.8 (D) × 8 (H)        |                   | 41.3 (W) × 37.5 (D) × 12.3 (H) |

#### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

## ■ Front-End Units for Digital Terrestrial and Analog Terrestrial Broadcasting

### ◆ Features

Contributing to the development of thinner LCD TVs and similar products by combining compatibility with digital and analog terrestrial broadcasts into a single unit.

### ◆ Standard Specifications

| Destination                             | Brazil                       | China*1          |
|---|------------------------------|------------------|
| Model No.                               | VA4M1BC1228                  | VA4M1CA1309      |
| Input frequency (MHz)                   | 47 to 866                    |                  |
| Output type                             | IF                           |                  |
| Digital IF bandwidth (MHz)              | 6                            | 8                |
| Phase noise (dBc/Hz)                    | -90 (TYP.) at 10 kHz offset  |                  |
| Supply voltage (V DC)                   | 3.3                          |                  |
| Noise figure (dB)                       | 4 (TYP.)                     |                  |
| Channel selection system                | PLL (I <sup>2</sup> C-bus)*2 |                  |
| Outline dimensions (W) × (D) × (H) (mm) | 30 × 28 × 7.5                | 26.2 × 20 × 10.6 |

\*1 Built-in isolator type

\*2 I<sup>2</sup>C-bus is a trademark of Philips Corporation.

### ◆ Features

Universal specifications compatible with various broadcasting systems all over the world.

Digital: DVB-T/T2, DVB-C, ATSC, ISDB-T, DTMB

Analog: NTSC-M/N, PAL-B/G/I/DK, SECAM-L, L'

### ◆ Standard Specifications

| Destination                             | Global        |
|---|---------------|
| Model No.                               | VA4M1DB1370   |
| Input frequency (MHz)                   | 47 to 868     |
| Output type                             | IF            |
| Noise figure (dB)                       | 4 (TYP.)      |
| Phase noise (dBc/Hz)                    | -90 (TYP.)    |
| Supply voltage (V)                      | 3.3           |
| Outline dimensions (W) × (D) × (H) (mm) | 27 × 14 × 7.5 |

Note: Contact SHARP for custom design product.

(For connector shape or facing side, analog output format, etc.)

#### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

EWBS: Emergency Warning Broadcasting System

## One-Seg Tuner Module

### ◆ Features

- (1) High sensitivity: -100 dBm (13 seg, QPSK CR: 2/3)
- (2) Compact and thin design: 5.4 × 5.4 × 1.0 mm
- (3) Low power consumption: 41 mW (with software power control)
- (4) Output interface: TS serial output

VA3A5JZ967

### ◆ Standard Specifications

|                                  |  |
|----------------------------------|--|
| Destination                      | Japan  |
| Model No.                        | VA3A5JZ967                                       |
| Input frequency (MHz)            | 470 to 770 (UHF: 13 to 62)                       |
| Input signal level (dBm)         | -100 (13 seg, QPSK CR: 2/3)                      |
| Supply voltage (V DC)            | 1.2 (RF)<br>1.2 (OFDM Core)<br>1.62 to 3.6 (I/O) |
| Power consumption (mW)           | 41 (TYP.)  |
| Operating temperature range (°C) | -20 to +65                                       |
| Control I/F                      | I <sup>2</sup> C-bus <sup>*1</sup>               |

#### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

### ■ Non-contact Vital & Motion Sensor Module

#### ◆ Features

- (1) Measures heart and breathing rate without contact using the Doppler effect.
- (2) The module can be embedded in products as sensing is possible through obstructions (except in cases where the obstructions are metal or metal plated).
- (3) Enables stable measurement without being affected by factors such as temperature, direct sunlight, or reflector color.

#### ◆ Standard Specifications

|                                     |  |
|-------------------------------------|--|
| Model No.                           | DC6M4JN3000  |
| Output frequency (GHz)              | 24.05 to 24.5  |
| Output interface                    | UART interface (baud rate: 115 200; data bit length: 8 bits)       |
| Applications                        | Heart rate / Breathing rate / Body motion                          |
| Measurable distance (m)             | MAX. 1 (heart rate and breathing rate)                             |
| Antenna                             | Planar antenna with 8 patch Tx / Rx antenna elements               |
| Antenna pattern (deg.)              | 30 (azimuth), 26 (elevation)                                       |
| Power supply (V)                    | 3.3  |
| Dissipation current (mA)            | 100 (including signal processing)                                  |
| Outline dimensions (W)×(D)×(H) (mm) | RF module: 31 × 47.5 × 14.5<br>Signal processor: 30.0 × 46.5 × 5.0 |

#### Notice

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

## ■ PM2.5 Sensor Module

### ◆ Features

- (1) Easy assembly for use in air purifiers and other products thanks to small size of 53 × 40 × 51 mm
- (2) Industry's shortest\*<sup>1</sup> detection time of 10 seconds
- (3) Digital output model is also part of line-up

\*<sup>1</sup> As of May 1, 2015 (measured by Sharp)

### ◆ Standard Specifications

| Model No.                            | DN7C3CA007<br>[Overseas]                                    | DN7C3CD015<br>[Japan / Overseas]                |
|--------------------------------------|---|---|
| Measuring range (μg/m <sup>3</sup> ) | 25 to 500   | 25 to 500                                       |
| Output type                          | Analog voltage  | Digital PWM                                     |
| Power supply voltage (Vcc/fan)       | DC5 V / DC5 V   | DC5 V / DC5 V                                   |
| Power consumption (mW) (TYP.)        | At sensor: 55,<br>At fan: 700 [JA001, CA006]<br>450 [CA007] | At sensor: 75,<br>At fan: 450                   |
| Output voltage range (V)             | 0 to 3.4 (MIN.)   | Vhigh: Vcc-1.5 (MIN.),<br>Vlow: 1.3 (MAX.)      |
| Operating temperature range (°C)     | -10 to +60  | -10 to +60                                      |
| Outline dimensions (mm)              | 53.0 × 40.0 × 51.0 (excluding protruding parts)             | 53.0 × 40.0 × 51.0 (excluding protruding parts) |

## ■ Temperature and Humidity Sensor

### ◆ Features

- (1) Package: 3.0 x 3.0 x 0.8 mm, reflowable, QFN
- (2) High-speed response: Approx. 7 sec.\*<sup>1</sup>
- (3) Interface: I<sup>2</sup>C

\*<sup>1</sup> For 63% of humidity change

### ◆ Standard Specifications

| Model No.       | QM1H0P0073             |                    |
|-----------------|------------------------|--------------------|
| Sensor          | Humidity sensor        | Temperature sensor |
| Type            | Macromolecule capacity | Semiconductor      |
| Measuring range | 0 to 100% RH           | -20 to +85°C       |
| Accuracy        | ±2% RH (25°C)          | ±0.3°C             |
| Resolution      | 0.1% RH                | 0.015°C            |
| Interface       | I <sup>2</sup> C       |                    |

#### Notice

## NOTICE

The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property right. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP devices.

SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structures and other contents described herein at any time without notice in order to improve design or reliability.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. Manufacturing locations are also subject to change without notice.

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that occur in equipment using any SHARP devices shown in catalogs, data books, etc.

The devices listed in this publication are designed for standard applications for use in general electronic equipment. SHARP's devices shall not be used for or in connection with equipment that requires an extremely high level of reliability, such as military and aerospace applications, telecommunication equipment (trunk lines), nuclear power control equipment and medical or other life support equipment (e.g. Scuba). SHARP takes no responsibility for damage caused by improper use of device, which does not meet the conditions for use specified in the relevant specification sheet.

If the SHARP devices listed in the publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.

This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.

Contact and consult with a SHARP representative if there are any questions about the contents of this publication.

The following facilities of Sharp Corporation have been certified under the ISO 14001 international standard for environmental management systems. In our products and manufacturing processes, we are actively engaged in environmental preservation efforts.

| Facility   | Certificate Mark | Certificate No. | Scope of Registered Activities   |
|--|------------------|-----------------|--|
| Advanced Development and Planning Center             | 1                | EC99J2038       | Research and development, production technology development, and manufacture of LCD panels |
| Mie Plant  | 1                | EC99J2051       | The manufacture of compact LCD panels  |
| Kameyama Plant                                       | 1                | EC04J0284       | Development, design and manufacture of LCDs  |
| Electronic Components and Devices Company (Fukuyama) | 2                | JQA-EM7239      | Design, development and manufacture of electronic devices                                  |
| Electronic Components and Devices Company (Mihara)   | 2                | JQA-EM7240      | Design, development and manufacture of laser diodes, hologram laser and LED devices        |

The following groups of Sharp Corporation have been certified under the ISO 9001:2008 international standard for quality management systems.

Certifying organization: Japan Quality Assurance Organization (JQA) [JAB certified]

| Group                                     | Certificate No. | Scope of Registered Activities  |
|---|-----------------|---|
| Electronic Components and Devices Company | JQA-QM8688      | The Sales, design/development and manufacturing of the following products.<br>Integrated circuits, RF devices, Opto-electronic devices, module, camera module,<br>application products of camera module, LED, application products of LED, laser diodes, hologram laser |
| Display Device Company                    | JQA-QM3776      | The design / development and manufacture of Liquid crystal display panel and module   |
