## KENDALL HOWARD

# RACK SCREWS W/WASHERS

The Kendall Howard Rack Screws with washers are not your everyday hardware store item. The superior American-made quality should be your only choice for securing rack mount devices such as shelves, cable managers, servers, and other network, A/V and electronic equipment.

- 0.75″ in length
- Phillips truss head
- Packaged in an aluminum tin (not bulk packs)
- RoHS Compliant
- Made in the USA

#### **FEATURES**

**Dog/Pilot Point** - The straight pointed section below the thread helps to self-guide the screw to prevent accidental stripping while also improving the ease of installation.

**Phillips Truss Head -** Truss head screws can be installed with one of the most universal tools on the market. Requires only a Phillips head screwdriver or bit.

**Compatible Rail Systems -** Kendall Howard rack screws can be utilized in any tapped rail system. They can also be installed in universal cage nut style rails when used in conjunction with cage nuts.

**Superior Manufacturing -** The cold hardened steel construction produces a high-quality finish with excellent dimensional stability. We then take it one step further and finish them with a black oxide coating so the screw blends with most standard black network racks, cabinets, and accessories.

**Protective Delrin Washer -** Distributes the pressure of the screw head more evenly to prevent damage or scratches to your rack mountable devices.
